## Preface

0. Background material	
A. Notational conventions	1
B. Topologizing filters of left ideals of $R$	1
C. The frame of torsion theories on $R\text{-mod}$	6
1. Derivatives on $R\text{-tors}$	
A. A bestiary	23
B. The structure of $D(R\text{-tors})$	31
C. Prenuclei on $R\text{-tors}$	43
2. Nuclei on $R\text{-tors}$	
A. Another bestiary	51
B. The structure of $N(R\text{-tors})$	58
3. Some further constructions	
A. The radical of $PN(R\text{-tors})$	74
B. The fixed set of a derivative	78
4. Dimensions defined by chains of derivatives	92
Appendix: The habitat of the beasts, a partial map	101
References	102
Index of terminology	116
