

CONTENTS

INTRODUCTION	vii
PROLOGUE	x
♦ Polynomial Identity Rings ♦ Group Algebras ♦ Rings of Differential Operators ♦ Enveloping Algebras ♦ Notation and Terminology	
1. A FEW NOETHERIAN RINGS	1
♦ The Noetherian Condition ♦ Formal Triangular Matrix Rings ♦ Construction of Skew Polynomial Rings ♦ Ideals in Skew Polynomial Rings ♦ Weyl Algebras ♦ Skew-Laurent Rings ♦ Additional Exercises ♦ Notes	
2. PRIME IDEALS	22
♦ Prime Ideals ♦ Semiprime Ideals and Nilpotence ♦ Annihilators and Associated Prime Ideals ♦ Affiliated Prime Ideals ♦ Primitive and Semiprimitive Ideals ♦ Prime Ideals in Differential Operator Rings ♦ Additional Exercises ♦ Notes	
3. SEMISIMPLE MODULES, ARTINIAN MODULES, AND NONSINGULAR MODULES	45
♦ Semisimple Modules ♦ Semisimple Rings ♦ Artinian Modules ♦ Artinian Rings ♦ Essential Extensions ♦ Nonsingular Modules ♦ Additional Exercises ♦ Notes	
4. INJECTIVE HULLS	65
♦ Injective Modules ♦ Injective Hulls ♦ Modules of Finite Rank ♦ Uniform Rank ♦ Direct Sums of Injective Modules ♦ Assassinator Primes ♦ Injective Hulls of Nonsingular Rings ♦ Additional Exercises ♦ Notes	
5. SEMISIMPLE RINGS OF FRACTIONS	86
♦ Orders in Semisimple Rings ♦ Technicalities ♦ Goldie's Theorems ♦ Division Rings of Fractions ♦ Nil Subsets ♦ Additional Exercises ♦ Notes	
6. MODULES OVER SEMIPRIME GOLDIE RINGS	99
♦ Minimal Prime Ideals ♦ Torsion ♦ Torsionfree Injective Modules ♦ Torsionfree Uniform Modules ♦ Torsionfree Modules over Prime Goldie Rings ♦ Notes	

7. BIMODULES AND AFFILIATED PRIME IDEALS	113
♦ Noetherian Bimodules ♦ Artinian Bimodules ♦ Prime Ideals in Finite Ring Extensions ♦ Bimodule Composition Series ♦ Additivity Principles ♦ Normalizing Extensions ♦ Notes	
8. FULLY BOUNDED RINGS	132
♦ Boundedness ♦ Embedding Modules into Factor Rings ♦ Artinian Modules ♦ Uniform Injective Modules ♦ Notes	
9. RINGS OF FRACTIONS	142
♦ Necessary Conditions ♦ Existence ♦ Modules of Fractions ♦ Submodules of Modules of Fractions ♦ Ideals in Rings of Fractions ♦ Prime Ideals in Iterated Differential Operator Rings ♦ Additional Exercises ♦ Notes	
10. ARTINIAN QUOTIENT RINGS	164
♦ Reduced Rank ♦ Applications of Reduced Rank to Finite Ring Extensions ♦ Small's Theorem ♦ Affiliated Prime Ideals ♦ Notes	
11. LINKS BETWEEN PRIME IDEALS	176
♦ Links ♦ Links and Short Affiliated Series ♦ Links and Affiliated Primes ♦ Artinian Rings ♦ The Artin–Rees Property ♦ Link–Finiteness ♦ Module–Finite Algebras ♦ Notes	
12. RINGS SATISFYING THE SECOND LAYER CONDITION	200
♦ Classical Krull Dimension ♦ Bimodule Symmetry and Intersection Theorems ♦ Finite Ring Extensions ♦ Localization at a Semiprime Ideal ♦ Embeddings in Artinian Rings ♦ Localization at Infinite Sets of Prime Ideals ♦ Notes	
13. KRULL DIMENSION	223
♦ Definitions and Basic Properties ♦ Prime Noetherian Rings ♦ Critical Modules ♦ Critical Composition Series ♦ FBN Rings ♦ Polynomial Rings and Weyl Algebras ♦ Notes	
14. NUMBERS OF GENERATORS OF MODULES	241
♦ Topologies on the Prime Spectrum ♦ Local Numbers of Generators ♦ Patch–Continuity of Normalized Ranks ♦ Generating Modules over Simple Noetherian Rings ♦ Generic Regularity ♦ Generating Modules over FBN Rings ♦ Countability of Cliques ♦ Notes	
15. TRANSCENDENTAL DIVISION ALGEBRAS	262
♦ Polynomials over Division Rings ♦ More Variables ♦ The Nullstellensatz ♦ Fully Bounded G -Rings ♦ Primitivity and Transcendence Degree ♦ Finite Generation of Subfields ♦ Notes	
APPENDIX. SOME TEST PROBLEMS FOR NOETHERIAN RINGS	284
BIBLIOGRAPHY	291
