INTRODUCTION

xi

CHAPTER 1. STRUCTURE OF RINGS

| | | |
|------|--|----|
| 1.1 | Baer Radical and Semiprimeness | 1 |
| 1.2 | Automorphism Groups and Lie Differential Algebras | 6 |
| 1.3 | Bergman-Isaacs Theorem. Shelter Integrality | 11 |
| 1.4 | Martindale Ring of Quotients | 19 |
| 1.5 | The Generalized Centroid of a Semiprime Ring | 24 |
| 1.6 | Modules over a Generalized Centroid | 27 |
| 1.7 | Extension of Automorphisms to a Ring of Quotients. Conjugation Modules | 40 |
| 1.8 | Extension of Derivations to a Ring of Quotients | 50 |
| 1.9 | The Canonical Sheaf of a Semiprime Ring | 53 |
| 1.10 | Invariant Sheaves | 62 |
| 1.11 | The Metatheorem | 65 |
| 1.12 | Stalks of Canonical and Invariant Sheaves | 77 |
| 1.13 | Martindale's Theorem | 81 |
| 1.14 | Quite Primitive Rings | 87 |
| 1.15 | Rings of Quotients of Quite Primitive Rings | 92 |

CHAPTER 2. ON ALGEBRAIC INDEPENDENCE OF AUTOMORPHISMS AND DERIVATIONS

| | | |
|-----|---|-----|
| 2.0 | Trivial Algebraic Dependences | 96 |
| 2.1 | The Process of Reducing Polynomials | 98 |
| 2.2 | Linear Differential Identities with Automorphisms | 103 |
| 2.3 | Multilinear Differential Identities with Automorphisms | 109 |
| 2.4 | Differential Identities of Prime Rings | 112 |
| 2.5 | Differential Identities of Semiprime Rings | 122 |
| 2.6 | Essential Identities | 126 |
| 2.7 | Some Applications: Galois Extensions of PI-Rings; Algebraic Automorphisms and Derivations; Associative Envelopes of Lie-Algebras of Derivations | 133 |

CHAPTER 3. THE GALOIS THEORY OF PRIME RINGS (THE CASE OF AUTOMORPHISMS)

| | | |
|-----|---|-----|
| 3.1 | Basic Notions | 142 |
| 3.2 | Some Properties of Finite Groups of Outer Automorphisms | 144 |
| 3.3 | Centralizers of Finite-Dimensional Algebras | 146 |
| 3.4 | Trace Forms | 157 |
| 3.5 | Galois Groups | 160 |
| 3.6 | Maschke Groups. Prime Dimensions | 163 |
| 3.7 | Bimodule Properties of Fixed Rings | 170 |
| 3.8 | Ring of Quotients of a Fixed Ring | 174 |
| 3.9 | Galois Subrings for M-Groups | 176 |

| | | |
|--|--|-----|
| 3.10 | Correspondence Theorems | 190 |
| 3.11 | Extension of Isomorphisms | 193 |
| CHAPTER 4. THE GALOIS THEORY OF PRIME RINGS (THE CASE OF DERIVATIONS) | | |
| 4.1 | Duality for Derivations in the Multiplication Algebra | 202 |
| 4.2 | Transformation of Differential Forms | 206 |
| 4.3 | Universal Constants | 209 |
| 4.4 | Shirshov Finiteness | 213 |
| 4.5 | The Correspondence Theorem | 216 |
| 4.6 | Extension of Derivations | 221 |
| CHAPTER 5. THE GALOIS THEORY OF SEMIPRIME RINGS | | |
| 5.1 | Essential Trace Forms | 228 |
| 5.2 | Intermediate Subrings | 231 |
| 5.3 | The Correspondence Theorem for Derivations | 234 |
| 5.4 | Basic Notions of the Galois Theory of Semiprime Rings (the case of automorphisms) | 236 |
| 5.5 | Stalks of an Invariant Sheaf for a Regular Group. Homogenous Idempotents | 241 |
| 5.6 | Principal Trace Forms | 253 |
| 5.7 | Galois Groups | 257 |
| 5.8 | Galois Subrings for Regular Closed Groups | 258 |
| 5.9 | Correspondence and Extension Theorems | 265 |
| 5.10 | Shirshov Finiteness. The Structure of Bimodules | 266 |
| CHAPTER 6. APPLICATIONS | | |
| 6.1 | Free Algebras | 270 |
| 6.2 | Noncommutative Invariants | 280 |
| 6.3 | Relations of a Ring with Fixed Rings | 292 |
| | A. Radicals of Algebras | 293 |
| | B. Units, Semisimple Artinian Rings, Essential Onesided Ideals | 298 |
| | C. Primitive Rings | 300 |
| | D. Quite Primitive Rings | 306 |
| | E. Goldie Rings | 309 |
| | F. Noetherian Rings | 313 |
| | G. Simple and Subdirectly Indecomposable Rings | 315 |
| | H. Prime Ideals. Montgomery Equivalence | 318 |
| | I. Modular Lattices | 327 |
| | J. The Maximal Ring of Quotients | 336 |
| 6.4 | Relations of a Semiprime Ring with Ring of Constants | 345 |
| 6.5 | Hopf Algebras | 355 |
