Preface . . . . .	ix
List of Symbols . . . . .	xiii
<b>1 Basic Concepts</b>	
1.1 Semisimple rings and modules . . . . .	1
1.2 Local and semilocal rings . . . . .	5
1.3 Serial rings and modules . . . . .	9
1.4 Pure exact sequences . . . . .	12
1.5 Finitely definable subgroups and pure-injective modules . . . . .	18
1.6 The category $({}_R\text{FP}, \text{Ab})$ . . . . .	25
1.7 $\Sigma$ -pure-injective modules . . . . .	28
1.8 Notes on Chapter 1 . . . . .	31
<b>2 The Krull-Schmidt-Remak-Azumaya Theorem</b>	
2.1 The exchange property . . . . .	33
2.2 Indecomposable modules with the exchange property . . . . .	36
2.3 Isomorphic refinements of finite direct sum decompositions . . . . .	39
2.4 The Krull-Schmidt-Remak-Azumaya Theorem . . . . .	43
2.5 Applications . . . . .	45
2.6 Goldie dimension of a modular lattice . . . . .	51
2.7 Goldie dimension of a module . . . . .	55
2.8 Dual Goldie dimension of a module . . . . .	57
2.9 $\aleph$ -small modules and $\aleph$ -closed classes . . . . .	61
2.10 Direct sums of $\aleph$ -small modules . . . . .	65
2.11 The Loewy series . . . . .	68
2.12 Artinian right modules over commutative or right noetherian rings . . . . .	70
2.13 Notes on Chapter 2 . . . . .	71

<b>3</b>	<b>Semiperfect Rings</b>	
3.1	Projective covers and lifting idempotents . . . . .	75
3.2	Semiperfect rings . . . . .	79
3.3	Modules over semiperfect rings . . . . .	82
3.4	Finitely presented and Fitting modules . . . . .	86
3.5	Finitely presented modules over serial rings . . . . .	92
3.6	Notes on Chapter 3 . . . . .	96
<b>4</b>	<b>Semilocal Rings</b>	
4.1	The Camps-Dicks Theorem . . . . .	99
4.2	Modules with semilocal endomorphism ring . . . . .	103
4.3	Examples . . . . .	108
4.4	Notes on Chapter 4 . . . . .	110
<b>5</b>	<b>Serial Rings</b>	
5.1	Chain rings and right chain rings . . . . .	113
5.2	Modules over artinian serial rings . . . . .	115
5.3	Nonsingular and semihereditary serial rings . . . . .	118
5.4	Noetherian serial rings . . . . .	121
5.5	Notes on Chapter 5 . . . . .	128
<b>6</b>	<b>Quotient Rings</b>	
6.1	Quotient rings of arbitrary rings . . . . .	129
6.2	Nil subrings of right Goldie rings . . . . .	132
6.3	Reduced rank . . . . .	134
6.4	Localization in chain rings . . . . .	140
6.5	Localizable systems in a serial ring . . . . .	142
6.6	An example . . . . .	147
6.7	Prime ideals in serial rings . . . . .	149
6.8	Goldie semiprime ideals . . . . .	152
6.9	Diagonalization of matrices . . . . .	155
6.10	Ore sets in serial rings . . . . .	158
6.11	Goldie semiprime ideals and maximal Ore sets . . . . .	161
6.12	Classical quotient ring of a serial ring . . . . .	162
6.13	Notes on Chapter 6 . . . . .	169
<b>7</b>	<b>Krull Dimension and Serial Rings</b>	
7.1	Deviation of a poset . . . . .	171
7.2	Krull dimension of arbitrary modules and rings . . . . .	175
7.3	Nil subrings of rings with right Krull dimension . . . . .	177
7.4	Transfinite powers of the Jacobson radical . . . . .	182
7.5	Structure of serial rings of finite Krull dimension . . . . .	187
7.6	Notes on Chapter 7 . . . . .	191

<b>8</b>	<b>Krull-Schmidt Fails for Finitely Generated Modules and Artinian Modules</b>	
8.1	Krull-Schmidt fails for finitely generated modules . . . . .	193
8.2	Krull-Schmidt fails for artinian modules . . . . .	201
8.3	Notes on Chapter 8 . . . . .	205
<b>9</b>	<b>Biuniform Modules</b>	
9.1	First properties of biuniform modules . . . . .	209
9.2	Some technical lemmas . . . . .	212
9.3	A sufficient condition . . . . .	216
9.4	Weak Krull-Schmidt Theorem for biuniform modules . . . . .	218
9.5	Krull-Schmidt holds for finitely presented modules over chain rings . . . . .	220
9.6	Krull-Schmidt fails for finitely presented modules over serial rings . . . . .	222
9.7	Further examples of biuniform modules of type 1 . . . . .	225
9.8	Quasi-small uniserial modules . . . . .	227
9.9	A necessary condition for families of uniserial modules . . . . .	231
9.10	Notes on Chapter 9 . . . . .	233
<b>10</b>	<b><math>\Sigma</math>-pure-injective Modules and Artinian Modules</b>	
10.1	Rings with a faithful $\Sigma$ -pure-injective module . . . . .	237
10.2	Rings isomorphic to endomorphism rings of artinian modules . . . . .	240
10.3	Distributive modules . . . . .	244
10.4	$\Sigma$ -pure-injective modules over chain rings . . . . .	249
10.5	Homogeneous $\Sigma$ -pure-injective modules . . . . .	251
10.6	Krull dimension and $\Sigma$ -pure-injective modules . . . . .	254
10.7	Serial rings that are endomorphism rings of artinian modules . . . . .	257
10.8	Localizable systems and $\Sigma$ -pure-injective modules over serial rings . . . . .	260
10.9	Notes on Chapter 10 . . . . .	264
<b>11</b>	<b>Open Problems</b> . . . . .	267
	<b>Bibliography</b> . . . . .	271
	<b>Index</b> . . . . .	283
