

# Contents

<b>Preface</b>	<b>iii</b>
<b>1 Commutative Algebra</b>	<b>1</b>
1.1 Module theory . . . . .	1
1.2 Graded modules . . . . .	12
1.3 Cohen-Macaulay modules . . . . .	16
1.4 Normal rings . . . . .	23
1.5 Koszul homology . . . . .	28
<b>2 Affine and Graded Algebras</b>	<b>31</b>
2.1 Noether normalizations . . . . .	31
2.2 Cohen-Macaulay graded algebras . . . . .	35
2.3 Hilbert Nullstellensatz . . . . .	45
2.4 Gröbner bases . . . . .	48
2.5 Minimal resolutions . . . . .	58
<b>3 Rees Algebras and Normality</b>	<b>65</b>
3.1 Symmetric algebras . . . . .	65
3.2 Rees algebras and syzygetic ideals . . . . .	66
3.3 Complete and normal ideals . . . . .	69
3.4 A criterion of Jürgen Herzog . . . . .	82
3.5 Jacobian criterion . . . . .	89
<b>4 Hilbert Series</b>	<b>97</b>
4.1 Hilbert-Serre's Theorem . . . . .	97
4.2 $a$ -invariants and $h$ -vectors . . . . .	106
4.3 Extremal algebras . . . . .	110
4.4 Initial degrees of Gorenstein ideals . . . . .	118
4.5 A symbolic study of Koszul homology . . . . .	125

<b>5</b>	<b>Monomial Ideals and Stanley-Reisner Rings</b>	<b>129</b>
5.1	Primary decomposition . . . . .	129
5.2	Simplicial complexes and homology . . . . .	138
5.3	Face rings . . . . .	142
5.4	Hilbert series of face rings . . . . .	150
5.5	Upper bound conjectures . . . . .	154
<b>6</b>	<b>Edge Ideals</b>	<b>161</b>
6.1	Graphs and ideals . . . . .	161
6.2	Cohen-Macaulay graphs . . . . .	172
6.3	Trees . . . . .	178
6.4	Bipartite graphs . . . . .	182
6.5	Links of some edge ideals . . . . .	185
6.6	First syzygy module of an edge ideal. . . . .	188
6.7	Edge rings with linear resolutions . . . . .	192
<b>7</b>	<b>Monomial Subrings</b>	<b>201</b>
7.1	Basic properties . . . . .	201
7.2	Integral closure of subrings . . . . .	209
7.3	Integral closure of monomial ideals . . . . .	233
7.4	Normality of some Rees algebras . . . . .	239
7.5	Ideals of mixed products . . . . .	248
7.6	Degree bounds for some integral closures . . . . .	259
7.7	Degree bounds in the square-free case . . . . .	261
7.8	Some lexicographical Gröbner bases . . . . .	276
<b>8</b>	<b>Monomial Subrings of Graphs</b>	<b>281</b>
8.1	The subring associated to a graph . . . . .	282
8.2	Rees algebras of edge ideals . . . . .	286
8.3	Incidence matrix of a graph . . . . .	294
8.4	Circuits of a graph and Gröbner bases . . . . .	296
8.5	Edge subrings of bipartite planar graphs . . . . .	303
8.6	Normality of bipartite graphs . . . . .	311
8.7	The integral closure of an edge subring . . . . .	315
8.8	The equations of the edge cone . . . . .	325
<b>9</b>	<b>Semigroup Rings of Complete Graphs</b>	<b>335</b>
9.1	Monomial subrings of bipartite graphs . . . . .	335
9.2	Monomial subrings of complete graphs . . . . .	350
9.3	Noether normalizations of edge subrings . . . . .	359

---

<b>10 Monomial Curves</b>	<b>367</b>
10.1 Defining equations of monomial curves . . . . .	367
10.2 Symmetric semigroups . . . . .	377
10.3 Ideals generated by critical binomials . . . . .	385
10.4 An algorithm for critical binomials . . . . .	399
<b>11 Affine Toric Varieties and Toric Ideals</b>	<b>403</b>
11.1 Systems of binomials in toric ideals . . . . .	403
11.2 Affine toric varieties . . . . .	409
11.3 Curves in positive characteristic . . . . .	414
<b>A Graph Diagrams</b>	<b>421</b>
A.1 Cohen-Macaulay graphs . . . . .	421
A.2 Unmixed graphs . . . . .	424
<b>Bibliography</b>	<b>425</b>
<b>Notation</b>	<b>447</b>
<b>Index</b>	<b>449</b>
