

## TABLE OF CONTENTS

Chapter I. FOUNDATIONS . . . . .	1
1. Special Jordan algebras and Jordan algebras . . . . .	3
2. Free special Jordan algebras. Cohn's theorem . . . . .	6
3. Homomorphic images of special Jordan algebras . . . . .	10
4. Some constructions of Jordan algebras . . . . .	12
5. Alternative algebras and Jordan algebras . . . . .	15
6. Varieties of algebras. Free algebras . . . . .	23
7. Basic Jordan identities. Jordan triple product . . . . .	33
8. Strongly associative subalgebras. Jordan triple product identities . . . . .	37
9. Macdonald's theorem. Shirshov's theorem . . . . .	40
10. $s$ -identities. Exceptional character of $\mathfrak{H}(\mathcal{D})_3$ . . . . .	49
11. Inverses and zero divisors . . . . .	51
12. Homotopy and isotopy . . . . .	56
Chapter II. ELEMENTS OF REPRESENTATION THEORY . . . . .	63
1. Associative specializations and universal envelopes . . . . .	65
2. Special universal envelopes for Jordan algebras with 1 and for direct sums . . . . .	72
3. Examples . . . . .	74
4. Associative algebras with involutions and Jordan algebras . . . . .	76
5. Bimodules for algebras in a variety $\mathcal{V}(I)$ . . . . .	79
6. Birepresentations for an algebra in a variety $\mathcal{V}(I)$ . . . . .	82
7. Multiplication specializations and universal envelopes . . . . .	86
8. Extension of algebras and factor sets . . . . .	91
9. Jordan bimodules and universal multiplication envelopes . . . . .	95
10. Associative specializations and multiplicative specializations . . . . .	99
11. Universal multiplication envelopes for Jordan algebras with identity elements . . . . .	102

12. Some basic criteria . . . . .	106
13. Examples and applications . . . . .	110

### Chapter III. PEIRCE DECOMPOSITIONS AND JORDAN MATRIX

ALGEBRAS . . . . .	117
1. Peirce decompositions . . . . .	118
2. Jordan matrix algebras . . . . .	125
3. Coordinatization theorems . . . . .	132
4. Perfection of certain classes of associative algebras with involutions . . . . .	138
5. Unital bimodules for Jordan matrix algebras . . . . .	144
6. Some remarks on the universal envelopes of Jordan matrix algebras . . . . .	147
7. Lifting of idempotents and Jordan matrix algebras . . . . .	148

### Chapter IV. JORDAN ALGEBRAS WITH MINIMUM CONDITIONS ON

QUADRATIC IDEALS . . . . .	152
1. Quadratic ideals . . . . .	153
2. Axioms and first structure theorem . . . . .	157
3. Determination of a class of alternative algebras with involution . . . . .	162
4. Simple Jordan algebras of capacity two . . . . .	171
5. Second structure theorem . . . . .	178
6. Special universal envelopes. Isomorphisms and derivations of special simple Jordan algebras satisfying the axioms . . . . .	183
7. Alternative set of axioms . . . . .	187

### Chapter V. STRUCTURE THEORY FOR FINITE-DIMENSIONAL JORDAN

ALGEBRAS . . . . .	189
1. Ideals and associator ideals . . . . .	190
2. Solvable ideals . . . . .	192
3. Finite-dimensional nil algebras . . . . .	195
4. Reduced Jordan algebras . . . . .	197
5. Structure of finite-dimensional semisimple Jordan algebras . . . . .	200
6. Reduced simple Jordan algebras . . . . .	202
7. Finite-dimensional central simple Jordan algebras . . . . .	206

Chapter VI. GENERIC MINIMUM POLYNOMIALS, TRACES AND NORMS . . .	213
1. Differentiation of rational expressions . . . . .	214
2. Differential calculus of rational mappings . . . . .	215
3. Generic minimum polynomial of a strictly power associative algebra . . . . .	221
4. Some important examples . . . . .	229
5. Multiplicative properties of the generic norm . . . . .	234
6. Separable algebras . . . . .	238
7. Norm similarity of Jordan algebras. The group of norm preserving linear transformations . . . . .	241
8. Determination of $M(\mathfrak{J})$ for $\mathfrak{J}$ special central simple of degree $\geq 3$ . . . . .	247
9. The Lie algebras $\mathfrak{M}(\mathfrak{J})$ , $\mathfrak{M}_0(\mathfrak{J})$ and $\text{Der } \mathfrak{J}$ for $\mathfrak{J}$ separable . . . . .	253
 Chapter VII. REPRESENTATION THEORY FOR SEPARABLE JORDAN ALGEBRAS	 259
1. Structure of Clifford algebras . . . . .	260
2. Structure of meson algebras . . . . .	264
3. Universal envelopes for finite-dimensional special central simple Jordan algebras of degree $\geq 3$ . . . . .	272
4. Bimodules for composition algebras and reduced Jordan algebras . . . . .	277
5. Separability of $\mathfrak{J}$ and $U(\mathfrak{J})$ . . . . .	286
6. The theorem of Albert-Penico-Taft . . . . .	286
7. Derivations into bimodules . . . . .	292
8. Uniqueness of the Albert-Penico-Taft decom- position . . . . .	303
 Chapter VIII. CONNECTIONS WITH LIE ALGEBRAS . . . . .	 307
1. Associator structure of a Jordan algebra. Abstract Lie triple systems . . . . .	307
2. Some results on completely reducible Lie algebras of linear transformations with applications to Jordan algebras . . . . .	312
3. Operator commutativity . . . . .	320
4. Derivations of semisimple Jordan algebras of characteristic 0 into bimodules . . . . .	323
5. The Tits-Koecher construction of a Lie algebra from a Jordan algebra . . . . .	324
6. Subalgebras and ideals of $\mathfrak{R} = \mathfrak{R}(\mathfrak{J})$ . . . . .	329

7. Application to a proof of the Albert-Penico Theorem . . . . .	333
8. Associative bilinear forms . . . . .	336
9. Examples. Functorial constructions . . . . .	339
10. Associator nilpotent Jordan algebras . . . . .	343
11. Cartan subalgebras of Jordan algebras. Associator regular elements . . . . .	349
12. Application to generic traces . . . . .	352
13. Conjugacy of Cartan subalgebras . . . . .	353
Chapter IX. EXCEPTIONAL JORDAN ALGEBRAS . . . . .	356
1. Preliminaries on identities and subalgebras . . . . .	357
2. Elements of rank one. Uniqueness of the coefficient algebra . . . . .	364
3. $\text{Aut } \mathfrak{J}/\Phi_e$ . . . . .	370
4. Conditions for isomorphism . . . . .	378
5. More on $\text{Aut } \mathfrak{J}$ . . . . .	382
6. Invariant factor theorem for split $\mathfrak{J}$ . . . . .	389
7. Moufang projective planes . . . . .	393
8. Elations . . . . .	397
9. Harmonicity . . . . .	402
10. Fundamental theorem of projective geometry for the planes $\mathfrak{P}(\mathfrak{J})$ . . . . .	404
11. Connections with exceptional Lie algebras . . . . .	407
12. Exceptional Jordan division algebras . . . . .	412
FURTHER RESULTS AND OPEN QUESTIONS . . . . .	423
BIBLIOGRAPHY . . . . .	443
SUBJECT INDEX . . . . .	451
