CONTENTS

Preface vii

I. Introduction 1

II. Arbitrary Nonassociative Algebras 9
1. Some Basic Concepts 9
2. The Associative Multiplication Algebra $\mathfrak{M}(\mathfrak{A})$ . . . 14
3. The Lie Multiplication Algebra $\mathfrak{L}(\mathfrak{A})$ 19
4. Trace Forms; Bimodules 23

III. Alternative Algebras 27
1. Nilpotent Algebras 27
2. The Peirce Decomposition 32
3. The Radical; Semisimple Algebras 37
4. Cayley Algebras 44
5. Simple Alternative Algebras 50
6. The Wedderburn Principal Theorem 58
7. Norm Forms 69
8. Derivations; Simple Lie Algebras of Type G 75

IV. Jordan Algebras 91
1. The Radical; Semisimple Algebras 91
2. Central Simple Jordan Algebras 100
3. Derivations; Simple Lie Algebras of Type F 109
4. Simple Lie Algebras of Type E_6 119

V. Power-Associative Algebras 128
1. The Peirce Decomposition 128

2. Finite Power-Associative Division Rings 133
3. Noncommutative Jordan Algebras 136
Bibliography 148
