Contents

Preface ix

CHAPTER 1. **Some Calculus**

1. Basic Notation 1
2. The Derivative 9
3. Higher Derivatives 18
4. Taylor's Formula 22
5. Inverse Function Theorem 28
6. The Algebra $gl(V)$ 32

CHAPTER 2. **Manifolds**

1. Differentiable Structures 41
2. Differentiable Functions 46
3. Submanifolds 49
4. Tangents and Cotangents 61
5. Tangent Maps (Differentials) 68
6. Tangent Bundle 74
7. Vector Fields 78
8. Integral Curves 84

CHAPTER 3. **Topological Groups**

1. Basics 90
2. Subgroups and Homogeneous Spaces 97
3. Connected Groups 102

CHAPTER 4. **Lie Groups**

1. Basic Structures 105
2. Local Lie Groups 108
3. Lie Subgroups 110

CHAPTER 5. **The Lie Algebra of a Lie Group**

1. The Lie Algebra 115
2. The Exponential Map 118
3. Exponential Formulas 125
4. Homomorphisms and Analytic Structure 135

CHAPTER 6. **Lie Subgroups and Subalgebras**

1. Lie Subalgebra and Uniqueness of Analytic Structure 139
2. Local Isomorphisms 142
3. Closed Subgroups 144
4. Homogeneous Spaces 148
5. Commutative Lie Groups 153

CHAPTER 7. · **Automorphisms and Adjoints**

1. Automorphisms of Algebras 157
2. Inner Derivations and Automorphisms 158
3. Adjoint Representations 160

CHAPTER 8. **Simply Connected Lie Groups**

1. Homotopy Review 167
2. Simply Connected Covering Groups 173

CHAPTER 9. **Some Algebra**

1. Tensor Products 178
2. Extension of the Base Field 180
3. Complexification 183
4. Modules and Representations 188
5. Semisimple Modules 190
6. Composition Algebras 194

CHAPTER 10. **Solvable Lie Groups and Algebras**

1. Solvable Lie Groups 201
2. Solvable Lie Algebras and Radicals 204
3. Lie's Theorem on Solvability 208

CHAPTER 11. **Nilpotent Lie Groups and Algebras**

1. Nilpotent Lie Groups 215
2. Nilpotent Lie Algebras 218
3. Nilpotent Lie Algebras of Endomorphisms 224

CHAPTER 12. **Semisimple Lie Groups and Algebras**

1. Invariant Bilinear Forms 229
2. Cartan's Criteria 235
3. Ideals and Derivations of Semisimple Lie Algebras 243
4. Complete Reducibility and Semisimplicity 245
5. More on Radicals, Derivations, and Tensor Products 255
6. Remarks on Real Simple Lie Algebras and Compactness 261

CHAPTER 13. **Cartan Subalgebras and Root Spaces**

1. Cartan Subalgebras 264
2. Root Spaces of Split Semisimple Lie Algebras 268
3. Irreducible Representations of $sl(2,K)$ 275

CHAPTER 14. **Simple Split Lie Algebras**

1. Root Systems 284
2. Classification of Split Simple Lie Algebras 300
3. On Automorphisms of Simple Complex Lie Algebras 311

CHAPTER 15. **Simple Real Lie Algebras and Groups**

1. Real Forms of Simple Complex Lie Algebra 314
2. Representations of Real and Complex Simple Lie Algebras 327
3. Some Simple Real and Complex Lie Groups 334

APPENDIX. **Some Differential Geometry**

1. Connections on Manifolds 338
2. Connections on Homogeneous Spaces and Nonassociative Algebras 343
3. Multiplicative Systems and Connections 347
4. Riemannian Connections and Jordan Algebras 350
