

Contents

List of Contributors	vii
Preface	ix
Examples, Counterexamples and the Computer <i>Erwin Kleinfeld</i>	1
Processing Identities by Group Representation <i>Irvin Roy Hentzel</i>	13
An Unnatural Attack on the Structure Problem for the Free Jordan Ring on 3 Letters: An Application of Quad Arithmetic <i>B. T. Smith and L. T. Wos</i>	41
On the Invariants of a Lie Group.I <i>Hans Zassenhaus</i>	139
Computation of Casimir Invariants of Lie Algebras <i>C. W. Conatser and P. L. Huddleston</i>	157
Computing the Structure of a Lie Algebra <i>Robert E. Beck, Bernard Kolman, and Ian N. Stewart</i>	167
What is the Typical Nilpotent Lie Algebra? <i>Eugene M. Luks</i>	189
Integer Clebsch–Gordon Coefficients for Lie Algebra Representations <i>Johan G. F. Belinfante</i>	209
The Computation of Branching Rules for Representations of Semisimple Lie Algebras <i>W. McKay, J. Patera, and D. Sankoff</i>	235

**Symmetrized Kronecker Powers of Representations of
Semisimple Lie Algebras**

Nigel Backhouse
