

Contents

Introduction	p. iii
Notation	p. vi
Part 1. Elementary notions	p. 1
§1.1 Definition and examples of Lie algebras	p. 1
§1.2 Representations and modules	p. 9
§1.3 Ideals and quotients	p. 14
§1.4 Direct and semidirect products	p. 18
§1.5 Solvable and semisimple Lie algebras	p. 23
§1.6 Nilpotent Lie algebras	p. 30
§1.7 Trace forms and the Killing form	p. 35
§1.8 More representations and modules	p. 43
§1.9 Field extension	p. 54
Exercises for Part 1	p. 57
Part 2. Structure and representation theory	p. 67
§2.1 Commuting sets of operators	p. 67
§2.2 Lie's theorem	p. 76
§2.3 Engel's theorem and the nilrepresentation theorem	p. 88

§2.4	Weight theory	p. 91
§2.5	Cartan subalgebras	p. 99
§2.6	Cartan's criteria	p. 105
§2.7	Semisimple and simple Lie algebras	p. 114
§2.8	Semisimple Lie algebras and semisimple modules	p. 117
§2.9	Reductive Lie algebras	p. 126
§2.10	Summary of characterizations of semisimple Lie algebras	p. 128
	Exercises for Part 2	p. 129
References	p. 137
