

# Contents

<i>Preface</i>	vii
1. Basic theory of Lie algebras	1
2. Free Lie algebras	42
3. Homogeneous structure of free Lie algebras	72
4. Varieties of Lie algebras	97
5. Finite basis problem	140
6. Special Lie algebras: structure, identities and applications	174
7. Identities in finite Lie algebras	219
8. Applications to group theory	257
<i>References</i>	298
<i>Notation index</i>	305
<i>Subject index</i>	307
