<i>Preface</i>	<i>iii</i>
Introduction	1
Chapter 1 Basic Functional Groups and Lie Algebras	21
1.1 Notations and Preliminaries	22
1.2 The Lie Algebras $C_0^k(X, \mathcal{G})$ and $\mathcal{D}(X, \mathcal{G})$	24
1.3 The Hilbert-Sobolev Lie Algebras $W_2^{(k)}(X, \mathcal{G})$	26
1.4 Technical Results About Some Continuous Sums of Operators	28
1.5 The Hausdorff Series On $\mathcal{D}(X, \mathcal{G})$	31
1.6 The Nuclear Group $\mathcal{D}(X, G)$	33
1.7 The Lie Algebra $C_0^k(X, \mathcal{G})$; The Groups $C_0^k(X, G)$	35
1.8 The Hilbert-Sobolev Lie Groups $W_2^{(k)}(X, G)$	36
1.9 The Gauge Groups and Their Various Sobolev Completions of Order 1	38
1.10 On Some Subgroups of $\mathcal{D}(X, G)$ and Related Topics	41
References	43

Chapter 2	Multiplicative G-Distributions on a Riemannian Manifold	45
2.1	Introduction	45
2.2	Basic Materials for a Theory of G -Distributions on a Riemannian Manifold	45
2.3	The Action of $\text{Diff}(X)$ on $\hat{\mathcal{D}}(X, G)$	50
2.4	A Basic Tool: Representations of Type (S)	52
2.5	Nonlocated Multiplicative G -Integrals; The Continuous Tensor Products of Representations of G	58
2.6	The Case Where G Is a Nilpotent Lie Group	64
	References	68
Chapter 3	The Energy Representations of Gauge Groups	69
3.1	Introduction	69
3.2	The Basic Energy Representation Associated with a Riemannian Flag	71
3.3	The Representation $U_F^{\mathfrak{g}}$ and Its Spectral Measure	73
3.4	Γ -Property; Γ' -Property	78
3.5	On the Irreducibility of the Basic Energy Representation U_F	79
3.6	Rings of Generalized Energy Representations	82
	References	85
Chapter 4	Energy Representations of Path Groups	87
4.1	Introduction	87
4.2	Standard Brownian Measure on Path Spaces	88
4.3	Reduction of the Energy Representation	91
4.4	Irreducibility of Almost All U^{α} 's and Properties of the Right and Left Versions U^R, U^L of the Energy Representation	96
4.5	Comments on Further Developments	105
	References	105
Chapter 5	The Algebraic Level: Representations of Current Algebras	107
5.1	Introduction	107
5.2	Affine Kac-Moody Algebras	108
5.3	Some Connected Problems and Applications	136
5.4	Beyond Affine Lie Algebras	152
	References	179
