

## Introduction

## Part I. Parabolic subsets of affine root systems and corresponding representations

- 1 Preliminaries on Affine Lie algebras and their representations
- 2 Parabolic subsets of affine root systems
- 3 Borel and parabolic subalgebras and corresponding representations

## Part II. Non-dense modules

- 4 Irreducible graded representations of the Heisenberg subalgebra
  - 4.1  $G$ -modules of non-zero level
  - 4.2  $G$ -modules of zero level
- 5 Verma type modules
  - 5.1 General properties
  - 5.2 Imaginary Verma modules
  - 5.3 Verma type modules of non-zero level
    - 5.3.1 BGG-resolution for Verma type modules of non-zero level
  - 5.4 Verma type modules of zero level
    - 5.4.1 Structure of modules  $M_X(\lambda)$
    - 5.4.2 Irreducible quotients of  $M_X(\lambda)$ . Case 1
    - 5.4.3 Irreducible quotients of  $M_X(\lambda)$ . Case 2
    - 5.4.4 Strong BGG-resolution for modules  $\hat{M}(\lambda_0)$
- 6 Generalized Verma type modules
  - 6.1 Non-standard generalized Verma modules
    - 6.1.1 Non-standard generalized Verma modules of non-zero level
    - 6.1.2 Non-standard generalized Verma modules of zero level
  - 6.2 Generalized Verma modules
    - 6.2.1 Generalized Verma modules for  $A_1^{(1)}$
- 7 Generalized loop modules
  - 7.1 Loop modules

8 On the classification of irreducible non-dense modules

- 8.1 Proof of the conjecture for algebra  $A_1^{(1)}$  and classification of irreducible non-dense  $A_1^{(1)}$ -modules with a finite-dimensional weight subspace

Part III. Irreducible weight modules of a non-zero level with finite-dimensional weight spaces

- 9 Non-density of irreducible modules of a non-zero level with finite-dimensional weight spaces
- 10 Existence of an admissible element in irreducible  $A_n^{(1)}$ -module of non-zero level with finite-dimensional weight spaces
- 11 Some combinatorics of the root system of  $A_n^{(1)}$
- 12 Weakly admissible elements and a characterization of irreducible modules

Part IV. Categories of  $\mathcal{G}$ -modules with Bernstein-Gelfand-Gelfand duality

13 Categories of  $\mathfrak{m}$ -modules

13.1 Truncated categories of  $\mathfrak{m}$ -modules

14 Categories of  $\mathcal{G}$ -modules of non-zero level

15 Categories  $\mathcal{G}$ -modules of zero level

16 Truncated categories of  $\mathcal{G}$ -modules

16.1 Some other examples of categories with BGG duality
