

# TABLE OF CONTENTS

<b>Preface</b>	v
<b>Schedule of Talks</b>	vii
<b>List of Participants</b>	xi

## INSTRUCTIONAL WORKSHOP

Semigroup and Ring Theoretical Methods in Probability KENNETH S. BROWN	3
Typical Examples of Tame Algebras THOMAS BRUESTLE	27
Representation Dimension and Solomon Zeta Function OSAMU IYAMA	45
Filtrations, Stratifications and Applications STEFFEN KOENIG	65
Bruhat-Renner Decomposition and Hecke Algebras of Reductive Monoids MOHAN S. PUTCHA	113
Representations and Blocks of Algebraic Monoids LEX E. RENNER	125
The Descent Algebra of the Symmetric Group MANFRED SCHOCKER	145

## SPECIALIZED WORKSHOPS

### Commutative Algebra, Algebraic Geometry and Representation Theory

A Remark on Letzter-Makar-Limanov Invariants YURI BEREST	165
Derived Categories of Coherent Sheaves on Rational Singular Curves IGOR BURBAN	173
Vector Bundles and Cohen-Macaulay Modules YURIY A. DROZD	189

## Finite Dimensional Algebras, Algebraic Groups and Lie Theory

Finite Dimensional Algebras, Quantum Groups and Finite Groups of Lie Type JIE DU	225
Stratified Algebras Arising in Lie Theory VOLODYMYR MAZORCHUK	245
Character Formulas of Kazhdan-Lusztig Type TOSHIYUKI TANISAKI	261
Weight Theory in the Context of Arbitrary Finite Groups PETER WEBB	277

## Quantum Groups and Hall Algebras

Restricted Two-parameter Quantum Groups GEORGIA BENKART AND SARAH WITHERSPOON	293
On Ringel-Hall Algebras BANGMING DENG AND JIE XIAO	319
Lusztig's Geometric Approach to Hall Algebras ZONGZHU LIN	349
The Use of Geometric and Quantum Group Techniques for Wild Quivers MARKUS REINEKE	365
An Introduction to Perverse Sheaves KONSTANZE RIETSCH	391
An Introduction to the Canonical Bases YOSHIHISA SAITO	431
Quivers of Type $A$ , Flag Varieties and Representation Theory OLIVIER SCHIFFMANN	453
