

Contents

<i>Preface</i>	xi
<i>Prerequisites</i>	xiii
Chapter I. Modules	
1 Rings and Modules	1
2 Chain Conditions	8
3 Direct Sums	12
4 Tensor Products	15
5 Flat Modules	21
Exercises	27
Chapter II. Primary Decompositions and Noetherian Rings	
1 Operations on Ideals and Submodules	36
2 Primary Submodules	39
3 Noetherian Rings	44
4 Uniqueness Results for Primary Decompositions	48
Exercises	52
Chapter III. Rings and Modules of Quotients	
1 Definition	61
2 Extension and Contraction of Ideals	66
3 Properties of Rings of Quotients	71
Exercises	74

Chapter IV. Integral Dependence

1	Definition of Integral Dependence	82
2	Integral Dependence and Prime Ideals	84
3	Integral Dependence and Flat Modules	88
4	Almost Integral Dependence	92
	Exercises	94

Chapter V. Valuation Rings

1	The Definition of a Valuation Ring	99
2	Ideal Theory in Valuation Rings	105
3	Valuations	107
4	Prolongation of Valuations	114
	Exercises	118

Chapter VI. Prüfer and Dedekind Domains

1	Fractional Ideals	124
2	Prüfer Domains	126
3	Overrings of Prüfer Domains	132
4	Dedekind Domains	134
5	Extension of Dedekind Domains	140
	Exercises	144

Chapter VII. Dimension of Commutative Rings

1	The Krull Dimension	156
2	The Krull Dimension of a Polynomial Ring	161
3	Valuative Dimension	164
	Exercises	168

Chapter VIII. Krull Domains

1	Krull Domains	171
2	Essential Valuations	179
3	The Divisor Class Group	185
4	Factorial Rings	190
	Exercises	194

Chapter IX. Generalizations of Dedekind Domains

1	Almost Dedekind Domains	201
2	ZPI-Rings	205
3	Multiplication Rings	209
4	Almost Multiplication Rings	216
	Exercises	220

Chapter X. Prüfer Rings

1	Valuation Pairs	226
2	Counterexamples	232
3	Large Quotient Rings	234
4	Prüfer Rings	236
	Exercises	244

**Appendix: Decomposition of Ideals
in Noncommutative Rings** 252

	Exercises	263
