

CONTENTS

<i>Author's Preface</i>	<i>page vii</i>
<i>Preliminaries</i>	1
 <i>Chapter I. THE PRIMARY DECOMPOSITION</i>	
1·1 A convention	4
1·2 Ideals and their calculus	4
1·3 The ideal generated by a set	8
1·4 Prime ideals	9
1·5 Primary ideals	10
1·6 Ideals with a primary decomposition	13
1·7 The isolated components of an ideal	17
1·8 Noetherian rings	19
1·9 Some additional properties of Noetherian rings	22
1·10 Some different kinds of rings	24
<i>Examples</i>	28
 <i>Chapter II. RESIDUE RINGS AND RINGS OF QUOTIENTS</i>	
2·1 Homomorphisms and isomorphisms	31
2·2 Residue rings	33
2·3 Further properties of residue rings	36
2·4 Extension rings	38
2·5 The full ring of quotients	39
2·6 Rings of quotients	41
2·7 Generalized rings of quotients	44
2·8 Local rings	47

*Chapter III. SOME FUNDAMENTAL PROPERTIES
OF NOETHERIAN RINGS*

3·1	The intersection theorem	<i>page</i> 49
3·2	Symbolic prime powers	50
3·3	The length of a primary ideal	51
3·4	Primary rings	54
3·5	Rank and dimension	56

*Chapter IV. THE ALGEBRAIC THEORY OF
LOCAL RINGS*

4·1	Notations and terminology	63
4·2	Systems of parameters	63
4·3	Indeterminates	65
4·4	Analytic independence	67
4·5	Minimal ideal bases	69
4·6	Regular local rings	70
4·7	Integral dependence and integral closure	73
4·8	One-dimensional regular local rings	75
4·9	Divisors	76
4·10	Another theorem on divisors	80
4·11	Continuation of §4·3	81

Chapter V. THE ANALYTIC THEORY OF LOCAL RINGS

5·1	Convergence	84
5·2	Complete rings	85
5·3	Concordant rings	87
5·4	Formal power series	89
5·5	The completion of a local ring	92
5·6	Some transition theorems	97
	<i>Notes</i>	101
	<i>References</i>	110
	<i>Index of Definitions</i>	111
