

CONTENTS

CHAPTER 0 : PRELIMINARIES

§ 1. Functors	1
§ 2. Exact sequences	2
§ 3. Tensor products	3
§ 4. Some properties of tensor products	5
§ 5. Exterior products	7

CHAPTER 1 : SOME RESULTS FROM COMMUTATIVE ALGEBRA

§ 1. Rings of fractions and localization	9
§ 2. Noetherian modules	13
§ 3. Some lemmas	16
§ 4. Primary decomposition	17
§ 5. Artinian modules and modules of finite length	25
§ 6. Graded and filtered modules, Artin-Rees Theorem	30

CHAPTER 2 : SOME RESULTS FROM HOMOLOGICAL ALGEBRA

§ 1. Complexes and homology	37
§ 2. Projective modules	42
§ 3. Projective resolutions	44
§ 4. The functors Tor	51
§ 5. The functors Ext.	61

CHAPTER 3 : DIMENSION THEORY

- | | |
|------------------------------------|----|
| § 1. The Hilbert-Samuel polynomial | 64 |
| § 2. The Dimension theorem | 71 |

CHAPTER 4 : A HOMOLOGICAL CHARACTERIZATION OF LOCAL RINGS

- | | |
|--|----|
| § 1. Homological dimension | 77 |
| § 2. Injective dimension and global dimension | 81 |
| § 3. Global dimension of noetherian local rings | 88 |
| § 4. Regular local rings | 92 |
| § 5. A homological characterization of regular local rings | 95 |

CHAPTER 5 : UNIQUE FACTORIZATION IN REGULAR LOCAL RINGS

- | | |
|--|-----|
| § 1. Locally free modules and a "cancellation lemma" | 100 |
| § 2. Unique factorization in regular local rings | 105 |
