

Contents

Preface	ix
Preface to the first edition	xi
PART I: NUMBERS	1
1 g -adic values of rational numbers	3
2 Pseudo-valuations and valuations	17
3 g -adic and p -adic numbers	33
4 The arithmetic of Q_g and Q_p	42
5 The decomposition of Q_g into p -adic fields	53
6 The quadratic extension fields of Q_p	65
PART II: FUNCTIONS	83
7 Elementary topological properties of R , Q_p , and Q_g	85
8 First properties of continuous g -adic functions	104
9 The interpolation series of a g -adic function	121
10 Characterisation of functions with the properties (N) and (W)	138
11 Further properties of p -adic functions	160
12 Remarks on functions of two variables	180
13 The derivative of a function on J or I_p	188
14 Higher derivatives	220
15 The Dieudonné integral	234
16 The van der Put series and integral	252
17 Definite integrals and difference equations	275
18 Functions on the quadratic extension fields of Q_p	301
References	316
Notation	318
Index	319
