

Commutative Banach algebras

Introduction	5
Chapter 0 Algebraic preliminaries	7
Chapter I Generalities, spectra, characters	11
Chapter II The spectrum and Gelfand transformation	20
Chapter III Holomorphic functional calculus with one variable	36
Chapter IV Holomorphic functional calculus with several variables	41
Chapter V Regular algebras	54
Chapter VI Banach function algebras	62
Chapter VII Commutative Banach algebras with involution	70
Chapter VIII Miscellaneous applications	80
Appendix I Polynomially and rationally convex compact subsets	91
Appendix II The algebras $\mathcal{O}(U)$ and $\mathcal{O}(K)$	93
Index	95
Bibliography	96

Von Neumann Algebras

Introduction	103
Chapter I The case of finite-dimensional Hilbert spaces	105
Chapter II Generalities on von Neumann algebras	120
Chapter III The theory of reduction	126
Chapter IV Study of the structure of factors	140

Topological algebras and holomorphic functions

Introduction	155
Chapter I Topological algebras	157
Chapter II Topological algebras and holomorphic functions ..	169
Appendix I Inductive and projective limits	184
Appendix II Complex analytic manifolds	188
Bibliography	193
