Table of Contents

Introduction

Conventions and notations

Chapter I. Analytic spaces and algebraic varieties 1

§1. GAGA, Proper mapping theorem, Stein factorization. .. 3

§2. Meromorphic mappings and the resolution of singularities. 13

§3. Algebraic dimensions and algebraic reductions of complex varieties. 24

Chapter II. D-dimensions and Kodaira dimensions 28

§4. Divisors and linear systems 30

§5. D-dimensions and L-dimensions. 50

§6. Kodaira dimension of a complex variety. 65

Chapter III. Fundamental theorems 76

§7. Proof of Theorem 5.10 and Theorem 6.11. 77

§8. Asymptotic behaviour of $\ell(mD)$. 86

Chapter IV. Classification of algebraic varieties and complex varieties 94

§9. Albanese mappings and certain bimeromorphic invariants. 96

§10. Subvarieties of complex tori. 116

§11. Classification theory. 125

Chapter V. Algebraic reductions of complex varieties and complex manifolds of algebraic dimension zero 141

§ 12. Algebraic reductions of complex varieties. 143

§ 13. Complex manifolds of algebraic dimension zero. 157

Chapter VI. Addition formula for Kodaira dimensions of analytic fibre bundles 172

§ 14. Pluricanonical representations of bimeromorphic transformation groups. 173

§ 15. Addition formula. 185

Chapter VII. Examples of complex manifolds 188

§ 16. Kummer manifolds. 190

§ 17. Complex parallelizable manifolds. 212

§ 18. Complex structures on a product of two odd-dimensional homotopy spheres. 228

Chapter VIII.

§ 19. Miscellaneous results. 240

Appendix

§ 20. Classification of surfaces. 248

Bibliography 260
