

CONTENTS

1.	Topological algebras	1
2.	Locally bounded algebras	8
3.	Commutative p-normed algebras. (A theorem on division algebras.)	13
4.	Commutative p-normed algebras. (Gelfand theory.) .	22
5.	Topological divisors of zero in p-normed algebras	30
5a.	Removable ideals in p-normed algebras. (Supplement to Lecture 5.)	38
6.	Analytic functions in p-normed algebras	42
7.	A characterization of multiplicative linear functionals	51
8.	Integral method in theory of p-normed algebras ..	57
9.	Generalized topological divisors of zero	73
10.	Locally convex algebras	78
11.	m-convex algebras	88
12.	Multiplicative linear functionals and spectra in m-convex algebras	93
13.	Topological divisors of zero and permanent singu- larity in m-convex algebras	112
14.	Non-m-convex algebras	124
15.	Extended spectrum in LC-algebras	130
16.	Entire functions in B_0 -algebras	137
17.	Entire operations in B_0 -spaces and their applica- tions to entire functions in B_0 -algebras	154
	Bibliographical comments on the lectures	168
	References	171-176
