

Table of Contents

Foreword	vii
Notation	ix
Chapter I. Topological Groups	1
1. Topological Groups	1
Exercises	8
2. Subgroups	10
Exercises	14
3. Quotient Groups	15
Exercises	22
4. Complete Groups	24
Exercises	31
5. The Bilateral Completion of a Hausdorff Group	32
Exercises	39
6. Metrizable Groups	40
Exercises	49
7. Metric Topologies on Groups	50
Exercises	55
8. Closed Graph and Open Mapping Theorems	56
Exercises	61
9. Locally Compact Topologies on Groups	63
10. Summability	69
Exercises	75
Chapter II. Topological Rings and Modules	77
11. Topological Rings	77
Exercises	83
12. Topological Modules	85
Exercises	92
13. Completions of Topological Rings and Modules	95
Exercises	100
14. Continuity of Inversion	106
Exercises	113

15.	Locally Bounded Modules	114
	Exercises	118
16.	Normed and Locally Bounded Rings	118
	Exercises	125
17.	Normable Rings	127
	Exercises	134
Chapter III.	Absolute Values	137
18.	Values	137
	Exercises	146
19.	Topologies Definable by Absolute Values	147
	Exercises	158
20.	Valuations	160
	Exercises	176
21.	Discrete Valuations	181
	Exercises	193
22.	An Introduction to Nonarchimedean Analysis	194
	Exercises	203
Chapter IV.	Topological Vector Spaces and Their Applications	207
23.	Topological Vector Spaces over Valued Division Rings	207
	Exercises	219
24.	Finite-dimensional Vector Spaces	224
	Exercises	231
25.	Principles of Functional Analysis	236
	Exercises	247
26.	Extensions of Absolute Values	256
	Exercises	266
27.	Locally Compact Division Rings	268
	Exercises	271
Chapter V.	Valuations	275
28.	Approximation Theorems	275
	Exercises	287
29.	Extensions of Valuations	290
	Exercises	298
30.	Valuations on Algebraic Extensions	299
	Exercises	317

31. Maximal Valuations and Linear Compactness	323
Exercises	335
32. Henselian Valuations	345
Exercises	363
Chapter VI. Locally Bounded Topologies	381
33. Locally Bounded Topologies on the Rational Field	381
Exercises	397
34. Dedekind Domains	398
Exercises	416
35. Linear Topologies on the Quotient Field of a Dedekind Domain	417
Exercises	430
36. Locally Bounded Topologies on Algebraic Number Fields and Algebraic Function Fields	431
Exercises	449
37. Locally Bounded Topologies on Orders of Algebraic Number Fields and Algebraic Function Fields	453
Exercises	466
Chapter VII. Historical Notes	469
38. The Origin of the Theory of Topological Fields	469
39. Absolute Values	472
40. Valuation Theory	477
41. Topological Vector Spaces	485
42. Topological Groups	490
43. Norms	496
44. Locally Bounded Topologies	502
Bibliography	511
Name Index	549
Subject Index	555
