PREFACE	iii
NOTATION	ix
PART I: SURVEY OF TOPOLOGICAL FIELDS	
1 INTRODUCTION	3
1.1 Neighborhood Bases at Zero	3
1.2 Alternate Axiomatizations	6
1.3 Basic Properties	8
2 VALUATIONS AND OTHER EXAMPLES	11
2.1 Prevaluations	11
2.2 Examples of Valued Fields	17
2.3 Other Examples	22
3 THE LATTICE OF RING TOPOLOGIES	30
3.1 Lattices of Topologies	30
3.2 Weakening Ring Topologies	32
3.3 Minimal Topologies	36
3.4 Independence	37
4 LOCALLY BOUNDED FIELDS	41
4.1 Bounded Sets	41
4.2 Locally Bounded Rings	43
4.3 Preorders	44
4.4 Preorders and Topologies	47
4.5 Lattice Results	54
4.6 Examples	60

5	NORMED FIELDS	63
5.1	Norms	63
5.2	Nilpotence and Normability	65
6	COMPLETENESS	69
6.1	Completions of Rings	69
6.2	Completions of Fields	70
7	EMBEDDING AND EXTENSION	74
7.1	The Problem	74
7.2	The Product Topology Extension	74
8	EXISTENCE OF FIELD TOPOLOGIES	77
9	CONNECTED FIELDS	83
10	DISCONNECTED FIELDS	87
10.1	Extremally Disconnected Fields	87
10.2	Ultraregular Fields	89
11	LINEAR FIELDS	91

PART II: VALUED FIELDS

12	ABSOLUTE VALUES	97
12.1	Nonarchimedean Absolute Values	97
12.2	Absolute Values on PID's	100
12.3	Equivalent Absolute Values	105
12.4	Equivalent Valuations	107
12.5	Powers of Absolute Values	109
13	PLACES	112
14	VECTOR SPACES AND STRICTLY MINIMAL FIELDS . . .	116
14.1	Strictly Minimal Fields	116
14.2	Completeness and Norms	121
14.3	Normed Algebras	125

15 EXTENSIONS OF VALUATIONS	132
15.1 Existence of Extensions	132
15.2 Archimedean Absolute Values	136
15.3 Complete and Algebraically Closed Fields	143
16 CHARACTERIZATIONS	147
16.1 Topologies Induced by Absolute Values	147
16.2 Archimedean Valuations	149
16.3 Type V Fields	151
16.4 Addiator Sequences	157
16.5 Topologies Induced by Valuations	161
APPENDIX A: TOPOLOGICAL GROUPS	164
A.1 Fundamental Properties	164
A.2 Norms	168
A.3 Uniformity	170
APPENDIX B: ORDERED GROUPS AND FIELDS	176
B.1 Ordered Sets	176
B.2 Partially Ordered Abelian Groups	185
B.3 Subgroups, Quotients, and Products	188
B.4 Extensions of Partial Orders	193
B.5 Totally Ordered Groups	197
B.6 Ordered Fields	202
B.7 Formal Power Series Fields	206
