CONTENTS

Preface vii

Chapter I. Topological Rings and Modules 1

1 Examples of Topological Rings 1

2 Topological Modules, Vector Spaces, and Algebras 11

3 Neighborhoods of Zero 18

4 Subrings, Ideals, Submodules, and Subgroups 23

5 Quotients and Projective Limits of Rings and Modules 32

Chapter II. Metrizability and Completeness 44

6 Metrizable Groups 44

7 Completions of Commutative Hausdorff Groups 55

8 Completions of Topological Rings and Modules 64

9 Baire Spaces 68

10 Summability 71

11 Continuity of Inversion and Adversion 80

Chapter III. Local Boundedness 88

12 Locally Bounded Modules and Rings 88

13 Locally Retrobounded Division Rings 94

14 Norms and Absolute Values 102

15 Finite-dimensional Vector Spaces 112

16 Topological Division Rings 120

Chapter IV. Real Valuations 134

17 Real Valuations and Valuation Rings 134

18 Discrete Valuations 141

19 Extensions of Real Valuations 152

Chapter V. Complete Local Rings 166

20 Noetherian Modules and Rings 166

21 Cohen Subrings of Complete Local Rings 173

22 Complete Discretely Valued Fields 186

23 Complete Local Noetherian Rings 192

24 Complete Semilocal Noetherian Rings 197

Chapter VI. Primitive and Semisimple Rings 206
25 Primitive Rings 206
26 The Radical of a Ring 216
27 Artinian Modules and Rings 226

Chapter VII. Linear Compactness and Semisimplicity 232
28 Linearly Compact Rings and Modules 232
29 Linearly Compact Semisimple Rings 241
30 Strongly Linearly Compact Modules 251
31 Locally Linearly Compact Semisimple Rings 256
32 Locally Compact Semisimple Rings 267

Chapter VIII. Linear Compactness in Rings with Radical 283
33 Linear Compactness in Rings with Radical 283
34 Lifting Idempotents 295
35 Locally Compact Rings 317
36 The Radical Topology 330

Chapter IX. Complete Local Noetherian Rings 359
37 The Principal Ideal Theorem 359
38 Krull Dimension and Regular Local Rings 368
39 Complete Regular Local Rings 377
40 The Japanese Property 391

Chapter X. Locally Centrally Linearly Compact Rings 398
41 Complete Discretely Valued Fields and Division Rings 398
42 Finite-dimensional Algebras 406
43 Locally Centrally Linearly Compact Rings 414

Chapter XI. Historical Notes 424
44 Topologies on Commutative Rings 424
45 Locally and Linearly Compact Rings 428
46 Category, Duality, and Existence Theorems 435

Bibliography 440

Errata 487

Index of Names 489

Index of Symbols and Definitions 492
