

	<u>Page</u>
<u>Introduction</u>	1
<u>Chapter I. The exact sequence of algebraic K-theory</u>	
§ 1. Categories with product, and their functors	7
§ 2. Directed categories of abelian groups	17
§ 3. $K_1 \mathcal{C}$ as a direct limit	21
§ 4. The exact sequence	27
§ 5. The category $\underline{P}$	34
§ 6. The category $\underline{FP}$	37
§ 7. The category $\underline{Pic}$	45
<u>Chapter II. Categories of modules and their equivalences</u>	
§ 1. Categories of modules; faithfully projective modules	48
§ 2. $k$ -categories and $k$ -functors	54
§ 3. Right continuous functors	57
§ 4. Equivalences of categories of modules	59
§ 5. Faithfully projective modules	65
§ 6. Wedderburn structure theory	70
§ 7. Autoequivalence classes; the Picard group	76
<u>Chapter III. The Brauer group of a commutative ring</u>	
§ 1. Separable algebras	82
§ 2. Assorted lemmas	87
§ 3. Local criteria for separability	100

§ 4. Azumaya algebras	104
§ 5. Splitting rings	111
§ 6. The exact sequence	113

Chapter IV. The Brauer-Wall group of graded azumaya algebras

§ 1. Graded rings and modules	122
§ 2. Separable algebras	125
§ 3. The group of quadratic extensions	127
§ 4. Azumaya algebras	129
§ 5. Automorphisms	131

Chapter V. The structure of the Clifford functor

§ 1. Bilinear modules	134
§ 2. The hyperbolic functor	140
§ 3. The Clifford functor	146
§ 4. The orthogonal group and spinor norm	158

BIBLIOGRAPHY
