

TABLE OF CONTENTS

Preface	v
Chapter 0. Topological Preliminaries	1
§1. Simplicial Homology	1
§2. Singular Homology and Relative Homology	4
§3. Cellular Homology	8
§4. De Rham Cohomology	11
§5. Cohomology with a Coefficient Sheaf	17
Chapter I. Commutative Algebra: An Introduction	25
§1. Affine and Projective Varieties	25
§2. Closed Ideals and Varieties	28
§3. Prime Ideals and Irreducible Varieties	31
§4. An Algebraic Interlude	35
§5. Coordinate Rings	42
§6. Dimension Theory	47
§7. Intersection Numbers	53
Chapter II. Singular Plane Curves	57
§1. Systems of Plane Curves	57
§2. Singular Points	59
§3. The Dual Curve	62
§4. The Classical Plücker Formulae	64
Chapter III. Divisors on a Compact Complex Manifold	69
§1. Chern Classes of Line Bundles	70
§2. Divisors and Holomorphic Line Bundles	73
§3. Linear Systems of Divisors	80
§4. Linear Systems on a Compact Riemann Surface and Holomorphic Maps	83
§5. Examples: Rational and Elliptic Curves	88

Chapter IV. Compact Riemann Surfaces	93
§1. The Hodge Theorem and Its Consequences	93
§2. Intersection Theory	99
§3. The Jacobian Variety and Abel's Theorem	105
§4. The Riemann-Roch Theorem and the Canonical Embedding	114
§5. Hyperelliptic Riemann Surfaces and the Weierstrass Points	122
§6. Some Remarks on Holomorphic Maps	128
Chapter V. Geometry of Projective Curves	133
§1. Local Hermitian Geometry	133
§2. Singular Metrics on a Riemann Surface	139
§3. The Complex Flag Manifold	143
§4. Metric Geometry of Projective Curves	146
§5. Associated Curves and Horizontal Curves	150
§6. Plücker Formulae for Projective Algebraic Curve	153
§7. Harmonic Maps from a Compact Riemann Surface	156
Chapter VI. A Brief Look at Algebraic Surfaces	161
§1. The Intersection Form	161
§2. Blows-Ups and Rational Maps	164
§3. The Kodaira Dimension of an Algebraic Surface	167
Bibliography	171
