

# Contents

<b>1</b>	<b>Introduction and background</b>	<b>1</b>
1.1	A brief history of algebraic curves . . . . .	2
1.2	Relationship with other parts of mathematics . . . . .	9
1.2.1	Number theory . . . . .	9
1.2.2	Singularities and the theory of knots . . . . .	10
1.2.3	Complex analysis . . . . .	15
1.2.4	Abelian integrals. . . . .	17
1.3	Real Algebraic Curves . . . . .	20
1.3.1	Hilbert's Nullstellensatz . . . . .	21
1.3.2	Techniques for drawing real algebraic curves . . . . .	22
1.3.3	Real algebraic curves inside complex algebraic curves . . . . .	24
1.3.4	Important examples of real algebraic curves . . . . .	24
<b>2</b>	<b>Foundations</b>	<b>29</b>
2.1	Complex algebraic curves in $\mathbf{C}^2$ . . . . .	29
2.2	Complex projective spaces . . . . .	34
2.3	Complex projective curves in $\mathbf{P}_2$ . . . . .	40
2.4	Affine and projective curves . . . . .	42
2.5	Exercises . . . . .	46
<b>3</b>	<b>Algebraic properties</b>	<b>51</b>
3.1	Bézout's theorem . . . . .	51
3.2	Points of inflection and cubic curves. . . . .	70
3.3	Exercises . . . . .	78
<b>4</b>	<b>Topological properties</b>	<b>85</b>
4.1	The degree-genus formula . . . . .	87
4.1.1	The first method of proof . . . . .	87
4.1.2	The second method of proof . . . . .	90
4.2	Branched covers of $\mathbf{P}_1$ . . . . .	94
4.3	Proof of the degree-genus formula . . . . .	98
4.4	Exercises . . . . .	110

<b>5</b>	<b>Riemann surfaces</b>	<b>111</b>
5.1	The Weierstrass $\wp$ -function . . . . .	111
5.2	Riemann surfaces . . . . .	124
5.3	Exercises . . . . .	138
<b>6</b>	<b>Differentials on Riemann surfaces</b>	<b>143</b>
6.1	Holomorphic differentials . . . . .	143
6.2	Abel's theorem . . . . .	152
6.3	The Riemann-Roch theorem . . . . .	159
6.4	Exercises . . . . .	177
<b>7</b>	<b>Singular curves</b>	<b>185</b>
7.1	Resolution of singularities . . . . .	185
7.2	Newton polygons and Puiseux expansions . . . . .	203
7.3	The topology of singular curves . . . . .	213
7.4	Exercises . . . . .	222
<b>A</b>	<b>Algebra</b>	<b>227</b>
<b>B</b>	<b>Complex analysis</b>	<b>229</b>
<b>C</b>	<b>Topology</b>	<b>235</b>
C.1	Covering projections . . . . .	235
C.2	The genus is a topological invariant . . . . .	240
C.3	Spheres with handles . . . . .	249
