## Introduction

<b>1. Grothendieck Categories</b>	<b>1</b>
1. Abelian categories . . . . .	1
2. Grothendieck categories . . . . .	11
<b>2. Torsion in Grothendieck categories</b>	<b>23</b>
<b>3. Localization in Grothendieck categories</b>	<b>33</b>
1. The localization functor . . . . .	33
2. An alternative approach . . . . .	40
3. Reflective subcategories . . . . .	45
<b>4. Gabriel filters</b>	<b>51</b>
<b>5. Localization in module categories</b>	<b>67</b>
1. Generalities . . . . .	67
2. Symmetric localization . . . . .	74
3. Finiteness conditions . . . . .	76
<b>6. Compatibility</b>	<b>85</b>
1. Compatibility in Grothendieck categories . . . . .	85
2. Compatibility in module categories . . . . .	94
<b>7. Stability</b>	<b>97</b>
1. Stability in Grothendieck categories . . . . .	97
2. Stability in module categories . . . . .	104

<b>8. Reflecting torsion</b>	<b>113</b>
1. Generalities . . . . .	113
2. Locally symmetric radicals . . . . .	119
<b>9. The relative Artin-Rees condition</b>	<b>125</b>
<b>10. Relative fully bounded rings</b>	<b>137</b>
1. Associated primes . . . . .	137
2. Gabriel's condition (H) . . . . .	145
<b>11. Classical localization</b>	<b>153</b>
1. The relative second layer condition . . . . .	153
2. Affiliated submodules . . . . .	161
3. The Artin-Rees property revisited . . . . .	165
4. Relative Ore sets . . . . .	167
<b>12. Structure sheaves</b>	<b>175</b>
1. Topologies and sheaves . . . . .	175
2. The symmetric case . . . . .	179
3. The classical case . . . . .	185
4. The general case . . . . .	190
<b>13. Functorial behaviour</b>	<b>201</b>
1. Topological aspects . . . . .	201
2. The symmetric case . . . . .	205
3. The classical case . . . . .	217
<b>Bibliography</b>	<b>225</b>
<b>Index</b>	<b>233</b>
