

TABLE OF CONTENTS

| | |
|---|-----|
| Preface | 9 |
| PART I - FINITE EMBEDDING THEOREMS FOR LATIN SQUARES AND QUASIGROUPS | |
| §1. Introduction. | 15 |
| §2. Systems of distinct representatives | 20 |
| §3. The Theorems of Ryser and Evans (latin rectangles and squares). | 27 |
| §4. Cruse's Theorems (commutative latin rectangles and squares). | 33 |
| §5. Hilton's Method (idempotent latin squares). | 42 |
| §6. Conjugate quasigroups and identities. | 47 |
| §7. Embedding Steiner quasigroups | 51 |
| §8. Embedding totally symmetric and semisymmetric quasigroups . | 60 |
| §9. Summary of embedding theorems | 68 |
| §10. The intersection preserving finite embeddability property (IPFEP). | 69 |
| §11. Separating sets of totally symmetric quasigroups. | 74 |
| §12. The IPFEP for the variety of all quasigroups. | 79 |
| §13. The IPFEP for varieties $V(I)$, where $x^2 = x \notin I$ | 85 |
| §14. The singular direct product | 89 |
| §15. The IPFEP for varieties $V(I)$, where $x^2 = x \notin I$ | 93 |
| §16. Summary of IPFEP embedding theorems | 98 |
| §17. Orthogonal latin squares and block designs. | 99 |
| §18. Embedding orthogonal partial latin squares. | 108 |
| §19. Room squares. | 113 |

| | |
|---|-----|
| §20. Embedding partial Room squares | 117 |
| §21. Problems | 120 |
| References | 124 |

PART II - APPROXIMATING ALGEBRAS BY FINITE ALGEBRAS

| | |
|--|-----|
| §1. Introduction | 131 |
| §2. Algebras and varieties | 134 |
| §3. Residual finiteness. | 137 |
| §4. Finite embeddability of partial algebras | 145 |
| §5. Partial \underline{V} -algebras | 156 |
| §6. Congruences and semicongruences of finite index. | 159 |
| §7. Finite separability properties | 167 |
| §8. Endomorphisms of algebras. | 174 |
| §9. The hopfian property | 179 |
| §10. Decision problems. | 183 |
| References | 193 |
