

IX

Table of Contents

Preface	III
Chapter 1. Algebras, Clones, and Clats	
0. Introduction	1
1. From algebras to clones	2
2. From clones to categories	7
3. Regular morphisms	15
4. Counterexamples	22
5. Extensions to diagrams	25
6. The categories <u>Abs</u> and <u>Diag</u>	28
Chapter 2. The Structure of <u>Abs</u>	
0. Introduction	36
1. Anamorphisms	36
2. Homomorphisms	40
3. Products	45
4. Mono-, epi-, and isomorphisms	48
5. Subobjects and quotients	51
6. Other limits and colimits	58
7. <u>Diag</u> and <u>Abs</u> as subcategories	60
8. Identities	64
Chapter 3. A First-Order Language for <u>Diag</u>	
0. Introduction	67
1. The language and theory <u>D</u>	68
2. Models of <u>D</u>	78
3. Extensions of <u>D</u>	84

Chapter 4. Clones, Monads, Monoids, and Varieties	
0. Monads	88
1. Monads over sets	96
2. Theories and monads	107
3. Monads are clones	116
4. Clones and varieties	119
References	124
