

INTRODUCTION .....	3
CONTENTS .....	6
CHAPTER 1. First concepts .....	8
1.1. Algebraic lattices .....	8
1.2. Ideals of semilattices .....	9
1.3. Closure operators .....	12
1.4. Equivalence relations .....	13
1.5. Algebraic lattices and join-homomorphism .....	15
1.6. Free Boolean algebra .....	17
CHAPTER 2. Congruence relations of algebras .....	20
2.1. Basic properties of congruences .....	20
2.2. Extension of congruences .....	24
2.3. Congruence lattices .....	26
2.4. Algebras of fixed similarity type .....	34
2.5. Congruence lattices of semigroups .....	39
2.6. Congruences of finite algebras .....	43
2.7. Modular congruence lattices and $n$ -permutability .....	49
2.8. Further topics .....	51
2.9. Problems .....	53
CHAPTER 3. Congruences of lattices .....	54
3.1. Congruence relations and weak projectivity .....	54
3.2. Congruences and ideals .....	62
3.3. Finite distributive lattices are congruence lattices ..	64
3.4. Weak projectivities in modular lattices .....	69
3.5. Congruence lattices of modular lattices .....	75
3.6. Distributive congruences of semilattices .....	82
3.7. Pre-skeleton .....	90
3.8. The proof of the main theorem .....	95
3.9. Further topics .....	102

3.10. Problems .....	105
APPENDIX. Congruence lattices of other algebras .....	107
BIBLIOGRAPHY .....	109
TABLE OF NOTATIONS .....	114
INDEX .....	115
