| PREFACE | 5 |
| INTRODUCTION | 11 |
| CHAPTER I -- BASIC DEFINITIONS AND PROPERTIES | 17 |
| 1 The concept of homogeneous and heterogeneous partial algebras | 17 |
| 1.1 Partial algebras | 18 |
| 1.2 Heterogeneous partial algebras | 21 |
| 1.3 Cardinal and ordinal dimension | 23 |
| 2 Homomorphisms, congruence relations and factor algebras | 24 |
| 2.1 Homomorphisms | 24 |
| 2.2 Isomorphisms | 25 |
| 2.3 Endomorphisms and automorphisms | 27 |
| 2.4 Full and closed homomorphisms | 28 |
| 2.5 Congruence relations | 30 |
| 2.6 Factor algebras | 33 |
| 2.7 The Homomorphism Theorem | 35 |
| 2.8 The congruence lattice of a full homomorphic image | 37 |
| 2.9 The analogue of the Second Isomorphism Theorem of E. Noether | 38 |
| 2.10 Mono- and epimorphisms | 39 |
| 2.11 Partial S -algebras and heterogeneous partial algebras | 40 |
| 2.12 Special observations concerning partial S -algebras | 42 |
| 3 Substructures, subalgebras, closed subsets, generation | 44 |
| 3.1 Substructures of partial algebras | 45 |
| 3.2 Comparison of substructures | 48 |
| 3.3 The global process of generation | 49 |
| 3.4 "Local" generation (generation "from below") | 49 |
| 3.5 The principle of algebraic induction | 51 |
| 3.6 Some further results concerning generation, epimorphisms | 52 |
| 3.7 The analogue of E. Noether's First Isomorphism Theorem | 54 |
| 4 Direct and reduced products, coproducts, direct limits and related constructions | 55 |
| 4.1 (Direct) Products (homogeneous case) | 55 |
| 4.2 Pullbacks and products of partial S -algebras | 59 |
| 4.3 ("Global") Coproducts and multiple pushouts | 61 |
| 4.4 Direct limits (= directed colimits) | 64 |
| 4.5 Reduced products and ultraproducts | 69 |
| 4.6 Some properties of the operators $H,..$, $S,..$ and $P,..$ | 71 |
| 5 Universal solutions, free partial algebras, Peano algebras, terms and term operations | 75 |
| 5.1 The general concepts of universal solution and freeness | 75 |
| 5.2 Partial Peano algebras | 77 |
| 5.3 Free completions | 80 |
| 5.4 The Generalized Recursion Theorem | 82 |
| 5.5 The algebraic quasi-ordering on partial algebras | 83 |
| 5.6 Tree representation of terms | 85 |
| 5.7 (Global) Term operations and polynomials | 86 |
| 5.8 The Epimorphism Theorem | 89 |
| 5.9 The initial closed congruence relations of a free completion | 91 |
| 5.10 On the cardinalities of M -generated partial algebras | 92 |
| 5.11 On the existence of K -universal solutions | 93 |
| 6 The equational theory of partial algebras | 95 |
| 6.1 Existence-equations | 95 |
| 6.2 Description of the model classes (E-varieties) | 98 |
| 6.3 More facts about freeness, fully invariant congruences | 102 |
| 6.4 Characterization of E-equational theories | 104 |

| | |
|---|----------------|
| CHAPTER II -- A BASIS FOR A TWO-VALUED MODEL THEORY FOR PARTIAL ALGEBRAS | 111 |
| 7 A "first order" language for (infinitary) partial (\underline{S} -) algebras | 111 |
| 7.1 The syntax | 112 |
| 7.2 The semantics | 115 |
| 7.3 Coincidence and Substitution Theorem | 116 |
| 8 Elementary implications, universal Horn formulas | 119 |
| 8.1 Some basic kinds of universal Horn formulas | 119 |
| 8.2 Algebraic encoding of universal Horn formulas | 123 |
| 8.3 Preservation properties of algebraic operators -- first visit | 125 |
| 8.4 The diagonal-fill-in property -- motivation | 127 |
| 9 Preservation (reflection) of formulas by mappings | 128 |
| 9.1 Preservation and reflection | 129 |
| 9.2 Examples for the reflection of formulas by homomorphisms | 132 |
| 10 Factorization systems of partial algebras | 137 |
| 10.1 The Galois connection induced by the unique-diagonal-fill-in-property . | 138 |
| 10.2 Factorization systems | 140 |
| 10.3 Examples of factorization systems for partial algebras | 146 |
| CHAPTER III -- BIRKHOFF TYPE RESULTS FOR ELEMENTARY IMPLICATIONS | 152 |
| 11 Direct limits revisited | 152 |
| 11.1 Morphisms between directed systems | 152 |
| 11.2 A device to measure "smallness" | 155 |
| 11.3 Direct limits and the operator " Λ " | 156 |
| 11.4 Sections, retractions and direct limits | 158 |
| 11.5 Some further concepts connected with direct limits | 159 |
| 11.6 Proof of Theorem 8.3.4 | 160 |
| 12 A Meta Birkhoff Type Theorem | 162 |
| 12.1 $HSP^{r,k}$ -cones | 162 |
| 12.2 A Meta Birkhoff Theorem | 163 |
| 12.3 "Compatible" classes H and S in $Alg(\underline{S})$ | 171 |
| 13 Construction of examples for the Meta Birkhoff Theorem | 174 |
| 13.1 k -dual algebraicalness of $\Lambda^{OP}(\underline{S})$ for some classes S of $Alg(\underline{S})$ -morphisms | 175 |
| 13.2 H -projective partial \underline{S} -algebras | 177 |
| 13.3 Examples in $Alg(\underline{S})$ for the Meta Birkhoff Theorem | 180 |
| 13.4 Special examples | 183 |
| 14 Closed classes of epimorphisms (elementary implications) | 186 |
| 14.1 Preparatory results | 186 |
| 14.2 The general theorem | 188 |
| 14.3 Closed sets of E -, ECE - and QE -equations and of $H_r S_C P^{r,k}$ -implications . | 190 |
| 14.4 Closed sets of ECH - and Horn-formulas | 196 |
| CHAPTER IV -- SPECIAL TOPICS | 198 |
| 15 Algebraic operations | 199 |
| 15.1 Superposition | 199 |
| 15.2 Algebraic partial operations of the first and second kind | 203 |
| 15.3 Algebraic partial operations of the third kind | 207 |
| 15.4 Algebraic total operations | 210 |
| 15.5 More about algebraic partial operations and terms; algebraic partial functions | 213 |
| 15.6 Algebraic partial operations and homomorphisms | 215 |
| 16 Semilattices of (weak) completions | 216 |
| 16.1 The semilattice of (weak) minimal completions | 217 |
| 16.2 The complete lattice of normal minimal completions | 219 |

| | | |
|------|--|-----|
| 17 | Independence, free partial algebras and primitive classes | 222 |
| 17.1 | Some properties of independence and independence classes | 222 |
| 17.2 | Relatively free completions of partial algebras | 223 |
| 17.3 | Relatively free completions of relatively free partial algebras | 228 |
| 17.4 | Characterization of heterogeneous relatively free partial algebras | 231 |
| 17.5 | Generators and relations | 233 |
| 17.6 | Initial objects and representation by canonical terms | 235 |
| 18 | Dependence of operations on arguments and element basis property | 239 |
| 18.1 | General concepts | 239 |
| 18.2 | Dependence on variables and algebraic independence | 242 |
| 18.3 | A counterexample for the infinitary homogeneous case | 246 |
| 19 | Congruence relations revisited | 247 |
| 19.1 | Closed congruence relations of finitary partial algebras | 247 |
| 19.2 | P-reflecting homomorphisms and P-closed congruence relations | 252 |
| 20 | Subdirect representations of partial algebras | 255 |
| 20.1 | The general concept and remarks | 255 |
| 20.2 | Classes of full and surjective homomorphisms -- arbitrary monomorphisms | 256 |
| 20.3 | The cases of full respectively closed monomorphisms | 260 |
| 20.4 | Subdirectly irreducible mono-unary partial algebras | 264 |
| 21 | More facts about homogeneous E-varieties | 266 |
| 21.1 | Initial homomorphic extensions | 267 |
| 21.2 | On the lattice of initial closed congruence relations -- homogeneous case | 271 |
| 21.3 | Relativized algebraic partial operations -- homogeneous case | 274 |

APPENDIX

| | | |
|------|---|-----|
| 22 | Survey on some additional concepts and results | 277 |
| 22.1 | Other concepts of homomorphisms | 277 |
| 22.2 | Further topics and hints to applications | 279 |
| 23 | Some definitions and facts from set theory | 281 |
| 23.1 | Some remarks on notations | 281 |
| 23.2 | Some remarks on an axiomatic approach | 284 |
| 23.3 | Ordinals | 286 |
| 23.4 | Cardinals | 289 |
| 24 | Ordered sets, algebraic lattices and Galois connections | 291 |
| 24.1 | Partially ordered sets lattices | 291 |
| 24.2 | k -directed posets, k -inductivity, k -algebraic lattices | 293 |
| 24.3 | Closure systems and closure operators | 294 |
| 24.4 | Galois connections | 297 |

| | |
|-----------------|-----|
| REFERENCES | 299 |
| LIST OF SYMBOLS | 306 |
| INDEX | 310 |

| | | |
|---------|--|-----|
| TABLES: | 1.1 Cardinal and ordinal dimension | 23 |
| | 8.1 Preservation of formulas by algebraic operators | 126 |
| | 9.1 Homomorphisms defined by reflection of formulas | 135 |
| | 10.1 Factorization systems in $\text{Alg}(S)$ | 150 |
| | 12.1 Compatibility of the operators H and S | 174 |
| | 13.1 Pairs (H,S) satisfying the assumptions of the Meta Birkhoff Theorem | 180 |
| | 13.2 Shape of the implications | 181 |
| | 20.1 (E,M) -subdirect representation theorems | 264 |
