Contributors	v
Preface	vii
Unification Theory, <i>J.H. Siekmann</i>	1
On Equational Theories, Unification and (Un)decidability, <i>H.-J. Bürckert, A. Herold and M. Schmidt-Schauss</i>	69
Unification in Permutative Equational Theories is Undecidable, <i>M. Schmidt-Schauss</i>	117
Matching — A Special Case of Unification? <i>H.-J. Bürckert</i>	125
On the Relationship of Congruence Closure and Unification, <i>P.C. Kanellakis and P.Z. Revesz</i>	139
On the Logic of Unification, <i>P. Le Chenadec</i>	157
Unification in a Combination of Arbitrary Disjoint Equational Theories, <i>M. Schmidt-Schauss</i>	217
Unification in Boolean Rings and Abelian Groups, <i>A. Boudet, J.-P. Jouannaud and M. Schmidt-Schauss</i>	267
Equational Problems and Disunification, <i>H. Comon and P. Lescanne</i>	297
Solving Word Equations, <i>H. Abdulrab and J.-P. Pécuchet</i>	353
Efficient Solution of Linear Diophantine Equations, <i>M. Clausen and A. Fortenbacher</i>	377
Adventures in Associative–Commutative Unification, <i>P. Lincoln and J. Christian</i>	393
Unification in Commutative Theories, <i>F. Baader</i>	417
Boolean Unification — The Story So Far, <i>U. Martin and T. Nipkow</i>	437
Order-Sorted Unification, <i>J. Meseguer, J.A. Goguen and G. Smolka</i>	457
Inheritance Hierarchies: Semantics and Unification, <i>G. Smolka and H. Ait-Kaci</i>	489
Basic Narrowing Revisited, <i>W. Nutt, P. Réty and G. Smolka</i>	517
Enumerating Outer Narrowing Derivations for Constructor-based Term Rewriting Systems, <i>J.-H. You</i>	541
Higher-order Unification Revisited: Complete Sets of Transformations, <i>W. Snyder and J. Gallier</i>	565
