1 Preliminaries

1.1 Basic Notions	1
1.1.1 Sets	1
1.1.2 Algebras	5
1.2 Generation, Structural Induction, Algebraic Recursion and Deductive Systems	8
1.2.1 Generation	8
1.2.2 Structural Induction	13
1.2.3 Terms and Algebraic Recursion	15
1.2.4 Deductive Systems	20
1.3 Relations	22
1.3.1 Regular Operations	23
1.3.2 Equivalence Relations	28
1.3.3 Partial Orders	31
1.3.4 Terminating Relations	35
1.3.5 Well-Quasi-Orders	39
1.3.6 Cofinality, Multiset Ordering and Polynomial Ordering	46
1.4 Trees	54
1.4.1 Trees and Well-Founded Partially Ordered Sets	55
1.4.2 Labelled Trees	59
1.5 ω-Complete Posets and Fixpoint Theorem	73
1.5.1 ω -Complete Posets	73
1.5.2 Fixpoint Theorem	76
1.5.3 Free ω -Completion	80

2 Reductions

2.1 Word Problem	89
2.1.1 Confluence Method	89
2.1.2 Word Problem for Congruences	94
2.2 Reduction Systems	102
2.2.1 Abstract Reduction Systems	103
2.2.2 Term Rewriting Systems	109
2.2.3 Termination of Term Rewriting Systems	120

3 Universal Algebra

3.1 Basic Constructions	135
3.1.1 Subalgebras and Generation	136
3.1.2 Images and Presentation	139
3.1.3 Direct Products and Subdirect Decompositions	151
3.1.4 Reduced Products and Ultraproducts	156

3.2 Equationally Defined Classes of Algebras	160
3.2.1 Equations	160
3.2.2 Free Algebras	164
3.2.3 Varieties	167
3.2.4 Equational Theories	175
3.2.5 Term Rewriting as an Algorithmic Tool for Equational Theories	183
3.3 Implicationally Defined Classes of Algebras	185
3.3.1 Implications, Finitary Implications and Universal Horn Clauses	186
3.3.2 Sur-Reflections	196
3.3.3 Sur-Reflective Classes, Semivarieties and Quasivarieties	199
3.3.4 Implicational Theories	216
3.3.5 Universal Horn Theories	227
3.3.6 Conditional Equational Theories and Conditional Term Rewriting	239
4 Applications	
4.1 Algebraic Specification of Abstract Data Types	243
4.1.1 Many-Sorted Algebras	244
4.1.2 Initial Semantics of Equational Specifications	251
4.1.3 Operational Semantics	260
4.2 Algebraic Semantics of Recursive Program Schemes	264
4.2.1 Ordered Algebras	265
4.2.2 Strict Ordered Algebras	275
4.2.3 ω -Complete Ordered Algebras	281
4.2.4 Recursive Program Schemes	290
