

Contents

Preface		III
Introduction		V
PART I	— MIXED MOTIVES FOR ABSOLUTE HODGE CYCLES	
§ 1	Some remarks on absolute Hodge cycles	1
§ 2	The category of mixed realizations	9
§ 3	The mixed realization of a smooth variety	25
§ 4	The category of mixed motives	43
PART II	— ALGEBRAIC CYCLES, K-THEORY, AND EXTENSION CLASSES	
§ 5	The conjectures of Hodge and Tate for smooth varieties	57
§ 6	Twisted Poincaré duality theories	79
§ 7	The conjectures of Hodge and Tate for singular varieties	107
§ 8	Homology and K-theory of singular varieties	121
§ 9	Extension classes, algebraic cycles, and the case $i = 2j - 1$	139
§ 10	On the non-injectivity of the Abel–Jacobi map	169
§ 11	Chow groups over arbitrary fields	178
PART III	— K-THEORY AND ℓ-ADIC COHOMOLOGY	
§ 12	Finite fields and global function fields	189
§ 13	Number fields	205
§ 14	Linear varieties	214
Appendix A:	A letter from Bloch to the author	222
Appendix B:	An example by C. Schoen	224
Appendix C:	Complements and problems	227
