

Groups & Guidance

Table of Contents

Groups & Gist: Preface	ix
Groups & Gratitude: Acknowledgements	ix
0 Groups & Goals	1
0.0 Introduction	1
0.1 Getting to Grips with Groups	5
0.2 Mastering Minor Model Theory	21
0.3 Examples	49
0.4 Historical and Bibliographical Remarks	52
1 Groups & Generality	53
1.0 Chain Conditions	54
1.1 Connected Components and Definability	60
1.2 \mathfrak{M}_c -groups and Nilpotency	73
1.3 Substability and Local Conditions	82
1.4 Engel Conditions	90
1.5 Sylow Theory	97
1.6 Historical and Bibliographical Remarks	106
2 Groups & Genericity	107
2.0 The Superstable Case	107
2.1 Generic Types	109
2.2 Transitive Group Operations	127
2.3 Fields	131
2.4 Generic Properties	133
2.5 Historical and Bibliographical Remarks	141

3	Groups & Grandeur	142
3.0	Foreignness and Internality	143
3.1	Analysability and Groups	150
3.2	Components	153
3.3	Involutions	160
3.4	Groups without an Abelian Normal Subgroup	161
3.5	Localized Lascar Rank	163
3.6	Ranked Groups	168
3.7	Fields	176
3.8	Bad Groups	180
3.9	Historical and Bibliographical Remarks	186
4	Groups & Geometry	188
4.0	Pre-geometries	189
4.1	Local Modularity	193
4.2	Locally Modular Groups	201
4.3	The Group Configuration	207
4.4	Quasi-endomorphisms	216
4.5	CM-Triviality	227
4.6	CM-Trivial Groups	231
4.7	Dimensionality	236
4.8	Binding Groups	243
4.9	Historical and Bibliographical Remarks	249
5	Groups & Grades	250
5.0	\mathfrak{R} -Groups	251
5.1	Abelian \mathfrak{R} -groups and \mathfrak{R} -fields	255
5.2	A Decomposition Theorem for \mathfrak{R} -groups	258
5.3	Linear Operations	260
5.4	Solubility and Nilpotency	263
5.5	Complements and Carter subgroups	269
5.6	The Frattini Subgroup	281
5.7	Involutions and Conjugacy Classes	282
5.8	Historical and Bibliographical Remarks	293
	Groups & Glory: References	294
	Groups & Gobbledegook: Index	303
