

# CONTENTS

Preface . . . . .	7
List of participants . . . . .	9
The scientific programme . . . . .	11
Quasi-isomorphism of $p$ -groups	
R. A. Beaumont and R. S. Pierce . . . . .	13
Méthodes topologiques en théorie des groupes abéliens	
B. Charles . . . . .	29
On a conjecture of Pierce concerning direct decompositions of Abelian groups	
A. L. S. Corner . . . . .	43
A generalization of dependence relations	
V. Dlab . . . . .	49
On the subgroups of an Abelian group that are ideals in every ring	
E. Fried . . . . .	51
Some generalizations of the exact sequences concerning Hom and Ext	
L. Fuchs . . . . .	57
Additive groups of integer-valued functions over topological spaces	
J. de Groot . . . . .	77
On the structure of Abelian $p$ -groups	
Kin-ya Honda . . . . .	81
On generating subgroups of Abelian groups	
J. M. Irwin and S. A. Khabbaz . . . . .	87
Einige Bemerkungen über die Automorphismen Abelscher $p$ -Gruppen	
H. Leptin . . . . .	99
$\mathcal{A}$ -ordering of the group Ext $(B, \mathcal{A})$	
F. Loonstra . . . . .	105
On the structure of Tor	
R. J. Nunke . . . . .	115
Endomorphism rings of primary Abelian groups	
R. S. Pierce . . . . .	125
Factorization of cyclic groups	
A. D. Sands . . . . .	139
Quotient categories and quasi-isomorphisms of Abelian groups	
E. A. Walker . . . . .	147
