

TABLE OF CONTENTS

| | |
|---|----|
| <i>Preface</i> | 5 |
| <i>Table of contents</i> | 9 |
| <i>Table of notations</i> | 12 |
| | |
| CHAPTER I. Basic concepts. The most important groups | |
| § 1. Notation and terminology | 13 |
| § 2. Direct sums | 17 |
| § 3. Cyclic groups | 22 |
| § 4. Quasicyclic groups | 23 |
| § 5. The additive group of the rationals | 25 |
| § 6. The p -adic integers | 26 |
| § 7. Operator modules | 27 |
| § 8. Linear independence and rank | 29 |
| Exercises | 34 |
| | |
| CHAPTER II. Direct sum of cyclic groups | |
| § 9. Free (abelian) groups | 37 |
| § 10. Finite and finitely generated groups | 39 |
| § 11. Direct sums of cyclic p -groups | 43 |
| § 12. Subgroups of direct sums of cyclic groups | 45 |
| § 13. Two dual criteria for the basis | 47 |
| § 14. Further criteria for the existence of a basis | 50 |
| Exercises | 52 |
| | |
| CHAPTER III. Divisible groups | |
| § 15. Divisibility by integers in groups | 57 |
| § 16. Homomorphisms into divisible groups | 59 |
| § 17. Systems of linear equations over divisible groups | 60 |
| § 18. The direct summand property of divisible groups | 62 |
| § 19. The structure theorem on divisible groups | 64 |
| § 20. Embedding in divisible groups | 65 |
| Exercises | 67 |
| | |
| CHAPTER IV. Direct summands and pure subgroups | |
| § 21. Direct summands | 71 |
| § 22. Absolute direct summands | 73 |
| § 23. Pure subgroups | 76 |
| § 24. Bounded pure subgroups | 79 |
| § 25. Factor groups with respect to pure subgroups | 81 |
| § 26. Algebraically compact groups | 83 |
| § 27. Generalized pure subgroups | 87 |
| § 28. Neat subgroups | 91 |
| Exercises | 93 |

CHAPTER V. Basic subgroups

| | |
|--|-----|
| § 29. Existence of basic subgroups. The quasibasis | 97 |
| § 30. Properties of basic subgroups | 101 |
| § 31. Different basic subgroups of a group | 103 |
| § 32. The basic subgroup as an endomorphic image | 106 |
| Exercises | 108 |

CHAPTER VI. The structure of p -groups

| | |
|---|-----|
| § 33. p -groups without elements of infinite height | 111 |
| § 34. Closed p -groups | 114 |
| § 35. The Ulm sequence | 117 |
| § 36. ZIPPIN's theorem | 121 |
| § 37. ULM's theorem | 123 |
| § 38. Construction of groups with a prescribed Ulm sequence | 127 |
| § 39. Non-isomorphic groups with the same Ulm sequence | 134 |
| § 40. Some applications | 135 |
| § 41. Direct decompositions of p -groups | 137 |
| Exercises | 141 |

CHAPTER VII. Torsion free groups

| | |
|--|-----|
| § 42. The type of elements. Groups of rank 1 | 145 |
| § 43. Indecomposable groups | 150 |
| § 44. Torsion free groups over the p -adic integers | 154 |
| § 45. Countable torsion free groups | 157 |
| § 46. Completely decomposable groups | 162 |
| § 47. Complete direct sums of infinite cyclic groups. Slender groups | 168 |
| § 48. Homogeneous groups | 173 |
| § 49. Separable groups | 176 |
| Exercises | 179 |

CHAPTER VIII. Mixed groups

| | |
|--|-----|
| § 50. Splitting mixed groups | 185 |
| § 51. Factor groups of free groups | 192 |
| § 52. A characterization of arbitrary groups by matrices | 196 |
| § 53. Groups over the p -adic integers | 198 |
| Exercises | 200 |

CHAPTER IX. Homomorphism groups and endomorphism rings

| | |
|--|-----|
| § 54. Homomorphism groups | 205 |
| § 55. Endomorphism rings | 210 |
| § 56. The endomorphism ring of p -groups | 214 |
| § 57. Endomorphism rings with special properties | 218 |
| § 58. Automorphism groups | 221 |
| § 59. Fully invariant subgroups | 224 |
| Exercises | 227 |

CHAPTER X. Group extensions

| | |
|--|-----|
| § 60. Extensions of groups | 233 |
| § 61. The group of extensions | 236 |
| § 62. Induced endomorphisms of the group of extensions | 239 |
| § 63. Structural properties of the group of extensions | 243 |
| Exercises | 247 |

CHAPTER XI. *Tensor products*

| | |
|--|-----|
| § 64. The tensor product | 249 |
| § 65. The structure of tensor products | 254 |
| Exercises | 256 |

CHAPTER XII. *The additive group of rings*

| | |
|--|-----|
| § 66. Ideals determined by the additive group | 259 |
| § 67. Multiplications on a group | 261 |
| § 68. Rings on direct sums of cyclic groups | 263 |
| § 69. Torsion rings | 265 |
| § 70. Torsion free rings | 268 |
| § 71. Nil groups and quasi nil groups | 272 |
| § 72. The additive group of Artinian rings | 280 |
| § 73. Artinian rings without subgroups of type p^∞ | 283 |
| § 74. The additive group of semi-simple and regular rings | 286 |
| § 75. The additive group of rings with maximum or restricted minimum condition | 288 |
| Exercises | 290 |

CHAPTER XIII. *The multiplicative group of fields*

| | |
|---|-----|
| § 76. Finite algebraic extensions of prime fields | 295 |
| § 77. Algebraically and real closed fields | 297 |
| Exercises | 298 |

CHAPTER XIV. *The lattice of subgroups*

| | |
|---|-----|
| § 78. Properties of the subgroup lattice | 300 |
| § 79. Projectivities. Projectivities of cyclic groups | 303 |
| § 80. Projectivities of torsion groups | 305 |
| § 81. Projectivities of torsion free and mixed groups | 309 |
| § 82. Dualisms | 311 |
| Exercises | 312 |

CHAPTER XV. *Decompositions into direct sums of subsets*

| | |
|---|-----|
| § 83. Decompositions of cyclic groups | 315 |
| § 84. Decompositions into weakly periodic subsets | 318 |
| § 85. Decompositions into an infinity of components | 324 |
| Exercises | 329 |

CHAPTER XVI. *Various questions*

| | |
|---|-----|
| § 86. Hereditarily generating systems | 332 |
| § 87. Universal homomorphic images | 336 |
| § 88. Universal subgroups | 341 |
| § 89. A combinatorial problem | 344 |
| Exercises | 350 |

| | |
|--------------------------------|-----|
| <i>Bibliography</i> | 353 |
| <i>Author index</i> | 363 |
| <i>Subject index</i> | 365 |
