

TABLE OF CONTENTS

Introduction	
Table of Contents	
0. Notation and Preliminaries	1
1. Types and Rank-1 Groups	5
2. Examples of Indecomposable Groups and Direct Sums	21
3. Endomorphism Rings and Decompositions of Rank-2 Groups	36
4. Pure Subgroups of Completely Decomposable Groups	40
5. Homogeneous Completely Decomposable Groups and Generalizations	47
6. Completely Decomposable Groups and Generalizations	58
7. Additive Categories, Quasi-Isomorphism and Near-Isomorphism	69
8. Stable Range, Substitution, Cancellation, and Exchange Properties	87
9. Subrings of Finite Dimensional \mathbb{Q} -Algebras	108
10. Orders in Finite Dimensional Simple \mathbb{Q} -Algebras	119
11. Maximal Orders in Finite Dimensional Simple \mathbb{Q} -Algebras	129
12. Near Isomorphism and Genus Class	139
13. Grothendieck Groups	148
14. Additive Groups of Subrings of Finite Dimensional \mathbb{Q} -Algebras	160
15. \mathbb{Q} -Simple and p -Simple Groups	167
List of References	178
