

Contents

Introduction	1
Chapter 1. Totally Projective Groups	7
1. Ulm's Theorem for Totally Projective Groups	7
2. Characterization of Totally Projective Groups	15
Chapter 2. Balanced Projective Groups	27
1. Local Theory	28
2. Global Theory	34
Chapter 3. Warfield Groups	58
1. Local Theory	59
2. Global Theory	71
Chapter 4. Characters and Duality of Locally Compact Abelian Groups	109
1. The Duality Theorem	109
2. Annihilators	111
3. Duality between Discrete and Compact Groups	114
4. Duality between Exact Sequences	118
5. Dualization of the Tensor Product	119
Chapter 5. The Duals of Totally Projective Groups	123
1. Smart and Duotype Subgroups, Simply Given Groups	123
2. Characterization and Invariants	127
Chapter 6. The Duals of Warfield Groups	131
1. The Duals of Warfield Modules	131
2. The Duals of Warfield Groups	144

Chapter 7. The Duals of Butler Groups	155
1. Butler Groups	155
2. The Duals of Butler Groups	159
Notation	166
Bibliography	168
Index	172
