CONTENTS

CHAPTER I · INTRODUCTION

PAGE

1. Sets, Systems, and Groups 3
2. Permutations 5
3. Definition of Group 15
4. Certain Permutation Groups 19
5. Properties of the Elements of a Group 26
6. Subgroups 28
7. Some Classes of Groups 29
8. Generators of Groups 30
9. Simple Isomorphism. Abstract Groups 31

MISCELLANEOUS EXERCISES 39

CHAPTER II · FIVE FUNDAMENTAL THEOREMS

10. Orders of Subgroups 44
11. Miscellaneous Theorems. Conjugate Elements and Subgroups 45
12. Representation of an Abstract Finite Group as a Regular Permutation Group 53
13. Sylow's Theorem 58
14. Generators of Abelian Groups 66
15. Prime-Power Groups 67

MISCELLANEOUS EXERCISES 71

CHAPTER III · ADDITIONAL PROPERTIES OF GROUPS IN GENERAL

16. Isomorphism 74
17. Isomorphisms of a Group with Itself 76
18. The Holomorph of a Group 79

PAGE
19. On Certain Subgroups of a Group G 81
20. Factor-Groups 84
21. The Composition-Series of a Group 88
22. The Theorem of Frobenius 92

MISCELLANEOUS EXERCISES 95

CHAPTER IV · ABELIAN GROUPS

23. Classification of Abelian Groups 98
24. Abelian Groups of a Given Order 101
25. Subgroups of a Prime-Power Abelian Group 102
26. Number of Elements of a Given Order 103
27. Groups of Isomorphisms of Cyclic Groups 104
28. Properties of an Abelian Group G of Order p^m and Type $(1, 1, \cdots, 1)$ 107
29. Analytical Representations of G, I, and K 108
30. Groups of Isomorphisms of Abelian Groups in General . . 112
31. Hamiltonian Groups 113

MISCELLANEOUS EXERCISES 118

CHAPTER V · PRIME-POWER GROUPS

32. General Properties 120
33. Some Self-conjugate Subgroups 122
34. Number of Subgroups of Index p 123
35. Number of Subgroups of Any Given Order 124
36. Prime-Power Groups Each with a Single Subgroup of a Given Order 128
37. Groups of Order p^m Each with a Cyclic Subgroup of Index p 132

MISCELLANEOUS EXERCISES 136

CHAPTER VI · PERMUTATION GROUPS

38. Introduction 138
39. Transitive Groups 139
40. Examples of Multiply Transitive Groups 143
41. An Upper Limit to the Degree of Transitivity 148

PAGE
42. Simplicity of the Alternating Group of Degree $n \neq 4$ . . . 153
43. Self-conjugate Subgroups of Symmetric Groups 154
44. Representation of a Group as a Transitive Group 155
45. Intransitive Groups 158
46. Primitive and Imprimitive Groups 159

MISCELLANEOUS EXERCISES 163

CHAPTER VII · DEFINING RELATIONS FOR ABSTRACT GROUPS

47. Introduction. Two General Theorems 166
48. Symmetric and Alternating Groups 169
49. Finite Groups $\{s, t\}$ such that $s^2 = t^2$ 177
50. Dihedral and Dicyclic Groups 181

MISCELLANEOUS EXERCISES 185

CHAPTER VIII · GROUPS OF LINEAR TRANSFORMATIONS

51. Properties of Linear Substitutions 188
52. Finite Groups of Linear Transformations 194
53. Reducible and Irreducible Groups 200
54. Composition of Isomorphic Groups 204
55. Representation of a Finite Group as a Group of Linear Homogeneous Transformations 206
56. Group Characteristics 210
57. Regular Permutation Groups 217
58. Certain Composite Groups 226
59. Transitive Groups in Which Only the Identity Leaves Two Symbols Fixed 229
60. Simply Transitive Groups of Prime Degree 234

MISCELLANEOUS EXERCISES 240

CHAPTER IX · GALOIS FIELDS

61. Introduction 242
62. Finite Fields 242

PAGE
63. Galois Fields 251
64. Existence of Galois Fields 256
65. Inclusion of One Finite Field within Another 260
66. Analytical Representation of Permutations 263
67. Linear Groups in One Variable in $GF[p^n]$ 265
68. Linear Fractional Groups in One Variable in $GF[p^n]$ . . . 266
69. Certain Doubly Transitive Groups of Degree p^n 267
70. Certain Doubly and Triply Transitive Groups of Degree $p^n + 1$ 272
71. A Class of Simple Groups 276

MISCELLANEOUS EXERCISES 286

CHAPTER X · GROUPS OF ISOMORPHISMS OF ABELIAN GROUPS OF ORDER p^m AND TYPE $(1, 1, \cdots, 1)$

72. Analytical Representation of Elements and Subgroups 289
73. The General Linear Homogeneous Group $GLH(k + 1, p^n)$ 291
74. Analytical Representations of the Group I of Isomorphisms of the Group $G_{(k+1)n}$ with Itself 295
75. On Certain Subgroups of I 300
76. The Holomorph of G 303
77. Doubly Transitive Groups of Degree p^n and Order $p^n(p^n - 1)$ 306
78. Analytical Forms of M 309
79. On Certain Elements and Subgroups of M 310
80. The Case of Certain Invariant Subgroups of M 313

MISCELLANEOUS EXERCISES 321

CHAPTER XI · FINITE GEOMETRIES

81. Definition of the Finite Projective Geometries 323
82. Representation of Finite Geometries by Means of Galois Fields 324
83. Representation of Finite Geometries by Means of Abelian Groups 328
84. Euclidean Finite Geometries $EG(k, p^n)$ 329
85. The Principle of Duality 330
86. Finite Geometries Contained within Finite Geometries . . 334

PAGE
87. Interrelations of Finite Geometries and Abelian Groups . 337
88. Some Generalizations 342
89. Geometric Sets of Subgroups 344
90. Another Analytical Representation of $PG(k, p^n)$ 345
91. Configurations in $PG(k, p^n)$ 346

MISCELLANEOUS EXERCISES 352

CHAPTER XII · COLLINEATION GROUPS IN THE FINITE GEOMETRIES

92. The Projective Group in $PG(k, p^n)$ 355
93. The Collineation Group in $PG(k, p^n)$ 358
94. Subgroups of the Collineation Group 362
95. Collineation Groups Leaving an $EG(k, p^n)$ Invariant . . . 374
96. Collineation Groups Leaving Other Subspaces Invariant . 383
97. Some Special Cases 385
98. Generators of Certain Multiply Transitive Groups of Prime Degree 387
99. Groups of Certain Prime Degrees 389

MISCELLANEOUS EXERCISES 393

CHAPTER XIII · ALGEBRAS OF DOUBLY TRANSITIVE GROUPS OF DEGREE p^n AND ORDER $p^n(p^n - 1)$

100. On the Definition of Group 395
101. Definition of Algebras $A[s]$ 396
102. Construction of Algebras $A[s]$ by Means of Certain Doubly Transitive Groups 398
103. Linear Transformations on the Marks of an $A[s]$ 400
104. Simple Isomorphism of Algebras $A[p^n]$ 402
105. Integral Elements of an Algebra $A[p^n]$ 404
106. Analytical Representations of Algebras $A[p^n]$ 405
107. The Algebras $A_{\sigma,l}[p^n]$ 406
108. Analytic Finite Plane Geometries 407

MISCELLANEOUS EXERCISES 413

CHAPTER XIV · TACTICAL CONFIGURATIONS

PAGE
109. Immediate Examples 415
110. Configurations Associated with Coble's Box Porism . . . 417
111. Certain Additional Configurations 418
112. Subgeometries and the Complementary Sets 419
113. Triple Systems and Triple Groups 425
114. Quadruple Systems 429
115. Configurations Associated with the Mathieu Groups . . . 431
116. Some Generalizations 433
117. Certain Complete 2-2-k-Configurations 435

MISCELLANEOUS EXERCISES 438

INDEX 443
