

TABLE OF CONTENTS

Minimal Resolutions.....	1
J. L. Alperin	
Sylow 2-Subgroups of Rank 3.....	3
J. L. Alperin	
The Extended ZJ-Theorem.....	6
J. L. Alperin, R. Brauer, and D. Gorenstein	
Finite Groups Generated by Odd Transpositions.....	8
M. Aschbacher	
Groups Generated by a Class of Elements of Order 3.....	12
M. Aschbacher and M. Hall	
Solvable Groups, Automorphism Groups, and Representation Theory.....	19
T. R. Berger	
Groups Whose Sylow 2-Groups Have Cyclic Commutator Groups.....	25
P. Chabot	
A Construction for the Smallest Fischer Group F_{22}	27
J. H. Conway	
Groups With a (B,N)-Pair of Rank 2	36
P. Fong and G. Seitz	
Characters of Symplectic Groups Over F_2	41
J. S. Frame and A. Rudvalis	
Strongly Closed Abelian 2-Subgroups of Finite Groups.....	55
D. M. Goldschmidt	
Finite Groups of Sectional 2-Rank At Most 4.....	57
D. Gorenstein and K. Harada	
Automorphisms of Extra Special Groups and Nonvanishing Degree 2 Cohomology.....	68
R. Griess, Jr.	
Characterizations of Some Finite Simple Chevalley Groups by Centralizers of Involution.....	74
M. E. Harris	
Remark on Shult's Graph Extension Theorem.....	80
D. G. Higman	
Simple Groups of Conjugate Type Rank ≤ 5	84
N. Ito	

A Class of Simple Groups of Characteristic 2	98
Z. Janko	
2-Groups Which Contain Exactly Three Involutions.....	101
M. Konvisser	
On Solving the Degree Equations in π -Groups.....	108
J. Leon	
On Finite Linear Groups of Degree Less Than $(q - 1)/2$	116
H. S. Leonard, Jr.	
A Setting for the Leech Lattice	117
J. McKay	
The Normal Structure of the One-point Stabilizer of a Doubly Transitive Group.....	119
M. O'Nan	
Flag-Transitive Subgroups of Chevalley Groups.....	122
G. Seitz	
Corollaries of Strongly Embedded Type from a Theorem of Aschbacher.....	126
R. Shepherd and E. Shult	
On Fusion in 2-Sylow Intersections.....	131
E. Shult	
The Existence and Uniqueness of Lyons' Group.....	138
C. C. Sims	
Isometries in Finite Groups of Lie Type.....	142
B. Srinivasan	
Centralizers of Involutions and the Classification Problem.....	147
J. H. Walter	
A Characterization of Orthogonal Simple Groups $P\Omega(2n, q)$	156
W. J. Wong
