

## CHAPTER 1

1.1	Lie Algebras and Root Systems	1
1.2	The Chevalley Groups	13
1.3	Basic Properties	17
1.4	The Chevalley Groups as Algebraic Groups	33
1.5	Semisimple Elements	41
1.6	The Classification of $G_\sigma$	44
1.7	Tori in $G_\sigma$	50

## CHAPTER 2

2.1	The Affine Weyl Group	54
2.2	The $p'$ -Rational Points in $\tilde{C}_0$	59
2.3	The Connected Centralizers of Semisimple Elements in $G$	61
2.4	The Connected Centralizers of Semisimple Elements in $G_\sigma$	74
2.5	The Brauer Complex and its Application to the Structure of $G_\sigma$	77

## TABLES

Table 1:	The Structure and the Orders of Connected Centralizers of Semisimple Elements in ${}^2E_6(q^2)$	128
Table 2:	The Structure ... in $F_4(q)$	133
Table 3:	The Structure ... in ${}^2F_4(2^{2n+1})$	137
Table 4:	The Structure ... in $G_2(q)$	138
Table 5:	The Structure ... in ${}^2G_2(3^{2n+1})$	139
Table 6:	The Structure ... in ${}^2B_2(2^{2n+1})$	139
Table 7:	The Structure ... in ${}^3D_4(q^3)$	140
