

CONTENTS

I—THE ORDINARY AND THE MODULAR REPRESENTATION THEORY OF A FINITE GROUP

<i>Part 1: The ordinary representation theory</i>	
Introduction	1
11.1 Permutation representations	1
11.2 The group algebra over a field F	6
11.3 Character theory	8
11.4 Applications	17
11.5 Induced representations	19
<i>Part 2: The modular representation theory</i>	
Introduction	21
12.1 The decomposition matrix D	22
12.2 Modular characters	25
12.3 Indecomposable and modularly irreducible representations	26
12.4 Character relations	29
12.5 Blocks	31
12.6 The Nakayama reciprocity formulae	33

II—ORDINARY REPRESENTATION THEORY OF \mathfrak{S}_n AND YOUNG'S RAISING OPERATOR

Introduction	35
2.1 Young's representation theory of \mathfrak{S}_n	35
2.2 Young's raising operator R_{ik}	39
2.3 The degree f^λ and the hook graph $H[\lambda]$	41
2.4 Lattice permutations	45
2.5 Skew diagrams	48

III— \mathfrak{S}_n AND THE FULL LINEAR GROUP $GL(d)$

Introduction	52
3.1 Inducing and restricting	54
3.2 The irreducible representation of $GL(d)$	57
3.3 The outer product $[\mu] \cdot [\nu]$	61
3.4 The inner product $[\alpha] \times [\beta]$	64
3.5 Symmetrized outer products $[\mu] \odot [\nu]$	66
3.6 Symmetrized inner products $[\mu] \otimes [\nu]$	71

IV—THE CHARACTERS OF \mathfrak{S}_n AND THE CONTENT OF $[\lambda]$

Introduction	74
4.1 Character of a cycle	75

4.2	Characters of \mathfrak{S}_n	77
4.3	The content of $[\lambda]$	80
4.4	The q -hook structure of $[\lambda]$	82
4.5	Character of a product of mq -cycles	85
4.6	The translation operator T	87
V—THE p -BLOCK STRUCTURE OF \mathfrak{S}_n		
	Introduction	90
5.1	Construction of $[\lambda]$ from $[\lambda]_q$ and the q -core $[\tilde{\lambda}]$	90
5.2	The hook graph $H[\lambda]$	93
5.3	The blocks of \mathfrak{S}_n	96
5.4	The primeness of q	99
VI—THE DIMENSIONS OF A p -BLOCK		
	Introduction	101
6.1	r -inducing and r -restricting	101
6.2	The r -Boolean algebra associated with $[\lambda]$	105
6.3	q -regular and q -singular Young diagrams	109
6.4	p -regular diagrams and p -regular classes of \mathfrak{S}_n	114
6.5	The number of modular irreducible representations in a block	116
VII—THE INDECOMPOSABLES OF \mathfrak{S}_n		
	Introduction	120
7.1	The D -matrix of a block of weight 1 of \mathfrak{S}_n	120
7.2	The D -matrix of a block of weight 2 of \mathfrak{S}_{2p}	122
7.3	Standard tableaux	124
7.4	The raising operator	126
7.5	Head and foot diagrams	130
7.6	The Nakayama reciprocity formulae	137
VIII—THE MODULAR IRREDUCIBLE REPRESENTATIONS OF \mathfrak{S}_n		
	Introduction	141
8.1	Congruence properties	142
8.2	The transforming matrix L	145
8.3	The raising operator	154
8.4	Decomposition matrices	161
8.5	r -Boolean algebras	162
	<i>Notes and References</i>	165
	<i>Bibliography</i>	169
	<i>Appendix (Tables)</i>	179
	<i>Index</i>	203
