

TABLE OF CONTENTS

	<u>Page</u>
PREFACE	iii
<u>CHAPTER I:</u> FINITELY GENERATED MODULES OVER PRINCIPAL IDEAL DOMAIN	1
§1. Principal Ideal Domain	1
§2. Preliminaries on Finitely Generated Modules over Principal Ideal Domains	12
§3. Torsion Modules	24
§4. Structure of Finitely Generated Modules	35
§5. Application to Abelian Groups	48
<u>CHAPTER II:</u> GROUPS OF LINEAR TRANSFORMATIONS	69
§1. Study of Linear Transformations of Vector Spaces	69
§2. Sesquilinear Forms	140
§3. Finite Groups of Linear Transformations	168
<u>CHAPTER III:</u> LINEAR REPRESENTATIONS OF GROUPS	184
§1. Definitions	184
§2. Examples of Representations	204
§3. Three Main Theorems	222
§4. Artinian Rings and their Finitely Generated Modules	249
§5. Structure of Semi-Simple Rings and Applications	265
§6. Algebraic Integers	305
§7. Characters of Representations	316
§8. Two Significant Theorems on Finite Groups	342
§9. Representations of the Symmetric Group	356
BIBLIOGRAPHY	378
