

TABLE OF CONTENTS

PART I

SEMIGROUPS AND RINGS OF LINEAR TRANSFORMATIONS

I.1	Definitions and notation	1
I.2	Dense rings of linear transformations	7
I.3	One-sided ideals of $\mathfrak{F}_U(V)$	16
I.4	Ideals of $\mathfrak{S}(V)$ and principal factors of $\mathfrak{M}_U(V)$	27
I.5	Semilinear isomorphisms	34
I.6	Groups of semilinear automorphisms	47
I.7	Extensions of semigroups and rings	54

PART II

SEMIPRIME RINGS WITH MINIMAL ONE-SIDED IDEALS

II.1	Prime rings	65
II.2	Simple rings	74
II.3	Maximal prime rings	85
II.4	Semiprime rings	91
II.5	Semiprime rings essential extensions of their socles	95
II.6	Semiprime atomic rings	102
II.7	Isomorphisms	105

PART III

LINEARLY TOPOLOGIZED VECTOR SPACES AND RINGS

III.1	A topology for a vector space	112
III.2	Topological properties of subspaces	120
III.3	Topological properties of semilinear transformations	125
III.4	Completion of a vector space	128
III.5	Linearly compact vector spaces	131
III.6	A topology for $\mathfrak{L}_U(V)$	136
III.7	A topology for $\mathfrak{F}_U(V)$	139
III.8	Another topology for $\mathfrak{L}_U(V)$	143
III.9	Complete primitive rings	146

APPENDIX

ON LINEARLY COMPACT PRIMITIVE AND SEMISIMPLE RINGS

0. Introduction	152
1. More about primitive rings	153
2. Inverse limits and linearly compact modules	156
3. Linearly compact primitive rings	159
4. Linearly compact semisimple rings	162
