Contents

PREFACE vii
LIST OF SYMBOLS ix

Chapter I. ORDERED GROUPS 1
§ 1. Partially ordered algebraic systems 1
§ 2. Simplest properties of ordered groups 3

Chapter II. ORDERABILITY CONDITIONS AND RELATIVELY CONVEX SUBGROUPS 8
§ 1. Semigroup conditions for O-groups and O^*-groups 8
§ 2. Archimedean groups. Group conditions for orderability 12
§ 3. Relatively convex subgroups 18
§ 4. Relative convexity of the center 25

Chapter III. PRODUCTS AND EXTENSIONS 28
§ 1. Free product 28
§ 2. Direct product with amalgamated subgroup. Nilpotent products 32
§ 3. Extensions 34

Chapter IV. EMBEDDINGS 36
§ 1. Completion of nilpotent O-groups 36
§ 2. Embedding in finitely generated groups 39
§ 3. Simple and nonhopfian groups 44

Chapter V. FULLY ORDERED GROUPS AND OTHER ORDERED ALGEBRAIC SYSTEMS 58
§ 1. Ordered division rings 58
§ 2. Semihomogeneously ordered groups 61
§ 3. Ordered modules 64
§ 4. Right-orderable groups 73

Chapter VI. EXTENSION OF ORDER 79
§ 1. O^*-groups 79
§ 2. Extension of order and relative convexity 89
§ 3. Escalation subgroups 93
§ 4. Intersection of full orders 96

Chapter VII. ORDER AND TOPOLOGY 101
§ 1. Order types of fully ordered groups 101
§ 2. Orderings of groups 103
§ 3. Hahn's theorem 106
§ 4. Open-interval topology on a fully ordered group 108

APPENDIX 118
§ 1. Extensions and wreath products 118
§ 2. Some properties of central extensions of groups 122
§ 3. On simple groups 125
§ 4. Matrix representation of a torsionfree nilpotent group 127
§ 5. On varieties of groups 129

BIBLIOGRAPHY 134
SUBJECT INDEX 146
