Remarks on the Algebraic Subsemigroups of Certain Compact Semigroups

L. W. ANDERSON AND R. P. HUNTER

Text	1
------	---

Semigroups and Amenability

MAHLON M. DAY

1. Introduction	5
2. General Definitions and First Criteria for Invariant Means	6
3. Properties of the Family of Amenable Semigroups	10
4. The Semigroup Algebra $l_1(\mathcal{S})$ and Its Second-Conjugate Algebra	13
5. Strong Amenability and Følner's Conditions	14
6. Fixed Point Theorems	18
7. Stationary Semigroups	20
8. Ergodic Theorems	26
9. Almost Convergence	31
10. Compact Semigroups	34
11. Semigroups with "Few" Invariant Means	35
12. Spectra and Norms of Convolutions by Probability Densities	37
13. Spectra and Norms of Convolutions	40
14. Extremely Left-Amenable Semigroups	46
15. Invariant Extensions of Linear Operators	48
References	50

Ternary Operations and Semigroups

EDWIN HEWITT AND HERBERT S. ZUCKERMAN

0. Introduction	55
1. Ternary Operations and Their Semigroups	56
2. Properties of Semigroups Expressible in Terms of xyz	63
3. Semigroups with the Same Triple Products	73
References	83

Problems about Compact Semigroups

KARL HEINRICH HOFMANN AND PAUL S. MOSTERT

Section I	86
Section II	94
Section III	98
References	99

A Survey of Results on Threads

R. J. KOCH

I. Structure	101
II. Existence of Local Threads; Extensions to Full Threads	102
III. Mapping Properties	103
IV. Internal Position	103
V. Miscellaneous	104
VI. Applications	104
References	105

Some Recent Results on the Structure of Inverse Semigroups

W. D. MUNN

1. Preliminaries	107
2. Bisimple Inverse Semigroups	109
3. Regular ω Semigroups	111
4. Fundamental Bisimple Inverse Semigroups and the Split Extension Theorem	113
Appendix	116
References	122

Algebraic Theory of Finite Semigroups: Structure Numbers and Structure Theorems for Finite Semigroups

JOHN RHODES

1. Introduction	125
2. The Prime Decomposition Theorem for Finite Semigroups	126
3. The Plot	128
4. Complexity	130
5. π Length for Finite Semigroups	146
6. Combinatorial Semigroups and Burnside-Type Problems	151
7. Jordan-Hölder Theorem for Finite Semigroups	154
8. Possible Extension of the Theory to Compact Semigroups	159
References	160

Appendix to "Algebraic Theory of Finite Semigroups": On the p Length of p -Solvable Semigroups: Preliminary Results

BRET R. TILSON

Introduction	163
1. Definitions of π Complexity and π Length: Elementary Results	164
2. Reduction Homomorphisms and Semilocal Theory	172
3. Axioms for π Length	178
4. π Length and Homomorphisms	181
5. π Length and Homomorphisms for a Restricted Class of Semigroups	196
References	208

Stationary Measures for Random Walks on Semigroups

M. ROSENBLATT

I. Introduction	209
II. Compact Semigroups	210
III. Measures on Countable Semigroups	213
References	220

The Study of Closets and Free Contents Related to Semilattice Decomposition of Semigroups

TAKAYUKI TAMURA

Introduction	221
I. Decomposition of a Semigroup and \mathcal{S} -Indecomposable Semigroups	222
II. Free Contents	232
III. Closets in Semigroups	242
References	259

Recent Results on Binary Topological Algebra

ALEXANDER DONIPHAN WALLACE

1. Cancellative Medial Means on an n Cell Are Arithmetic	261
2. The Skin Problem for $n = 2$	262
3. Actions on Irreducible Continua	263
References	267
