

TABLE OF CONTENTS

| | |
|--|----|
| INTRODUCTION | 1 |
| CHAPTER I. PRELIMINARIES | |
| 1. Compactness Criteria | 12 |
| Theorem 1.8 | 16 |
| Equivalent conditions for compactness in function spaces. | |
| 2. Equicontinuous Semigroups of Linear Operators and Affine Transformations. Affine Semigroups | 21 |
| Theorem 2.9 | 26 |
| The almost periodic subspace. | |
| Theorem 2.10 | 27 |
| The weakly almost periodic subspace. | |
| Proposition 2.13 | 30 |
| Kakutani fixed point theorem. | |
| Theorem 2.16 | 34 |
| Ryll-Nardzewski fixed point theorem. | |
| 3. Ellis' Theorem | 36 |
| 4. Actions of Compact Groups on Topological Vector Spaces | 37 |
| Proposition 4.5 | 41 |
| A Banach weak G -module is a strong G -module if G is a locally compact group. | |
| CHAPTER II. COMPACT SEMITOPOLOGICAL SEMIGROUPS | |
| 1. Algebraic Background Material | 44 |
| Proposition 1.9 | 47 |
| The Rees Theorem. | |
| Proposition 1.23 | 57 |
| The group supporting subspace. | |
| Proposition 1.26 | 59 |
| The semigroup with zero supporting subspace. | |

| | |
|---|----|
| 2. Locally Compact Paragroups | 60 |
| Proposition 2.4 | 61 |
| The structure of a minimal ideal in a locally compact semitopological semigroup. | |
| 3. Compact Semitopological Semigroups | 65 |
| Theorem 3.5 | 67 |
| The first fundamental theorem of compact semitopological semigroups. | |
| Proposition 3.12 | 71 |
| The strongly almost periodic subspace. | |
| Theorem 3.23 | 80 |
| The main theorem on semigroups of operators on a Banach space. | |
| 4. Invariant Measures on Locally Compact Semigroups .. | 88 |
| Theorem 4.14 | 97 |
| Necessary and sufficient conditions for invariance of a measure. | |

CHAPTER III. ALMOST PERIODIC AND WEAKLY ALMOST PERIODIC
FUNCTIONS ON SEMITOPOLOGICAL SEMIGROUPS

| | |
|---|-----|
| 1. Various Universal Functors | 112 |
| 2. The Definition of Almost Periodic Functions | 120 |
| Proposition 2.10 | 126 |
| Decomposition of weakly almost periodic functions. | |
| 3. Invariant Means | 127 |
| Theorem 3.2 | 127 |
| 4. Locally Compact Semitopological Semigroups | 130 |
| Proposition 4.5 | 132 |
| Necessary and sufficient conditions for the embedding into the weakly almost periodic compactification to be topological. | |

| | |
|---|-----|
| Proposition 4.6 | 133 |
| Equivalent conditions on the embedding of S into ΩS . | |
| Proposition 4.11 | 136 |
| Analogue of 4.5 for the almost periodic compactification. | |
| Proposition 4.12 | 137 |
| Analogue of 4.6 for AS. | |
| Proposition 4.14 | 138 |
| The almost periodic compactification of a topologically left simple semigroup. | |
| Proposition 4.16 | 140 |
| Partial analogue of 4.14 for the weakly almost periodic compactification. | |
| CHAPTER IV. EXAMPLES | 146 |
| BIBLIOGRAPHY | 158 |
