CONTENTS

INTRODUCTION xi

CHAPTER I INTEGRATION ON LOCALLY COMPACT SPACES

1. Introduction 1
2. Motivation 2
3. Compact spaces 6
4. Locally compact spaces 9
5. Normal spaces 11
6. Positive integrals of continuous functions with compact supports 16
7. Semicontinuous functions 22
8. Positive integrals of integrable functions 27
9. Fatou's theorem 34
10. Null functions and null sets 36
11. The Riesz-Fischer theorem 37
12. Continuous partitions of unity 39
13. Compactness on Cartesian products 42
14. Integration on Cartesian products 45

CHAPTER II INTEGRATION ON LOCALLY COMPACT GROUPS

1. Introduction 49
2. Motivation 51
3. Topological groups 54
4. The Haar integral 64
5. Properties of the Haar integral 75
6. Relatively invariant integrals 93
7. Topological semidirect and semi-Cartesian products . . 96
8. Proof of the existence and uniqueness of the Haar integral according to André Weil 101
9. Proof of the existence and uniqueness of the Haar integral according to Henri Cartan 112

CHAPTER III INTEGRATION ON LOCALLY COMPACT HOMOGENEOUS SPACES

1. Introduction 120
2. Motivation 121
3. Topological homogeneous spaces 125
4. Conditions for the existence and uniqueness of invariant and relatively invariant integrals 134
